

Simplify Virtual Engagement and Elevate Patient Care

RTConnect's tools serve as a virtual communication hub for remote healthcare by giving you the opportunity to engage with patients, therapists, referral sources and payors via voice, text and video.

-  **No Cost, No Obligation** – We are providing you with these tools at no cost for the duration of the COVID-19 crisis or for 6 months, whichever is longer.
-  **Easy, Fast Setup** – Our solutions are ready to use and have the ability to pre-load patient information such as their name, email address and phone number.
-  **Flexible & Configurable** – RTConnect can work out-of-the-box to meet your needs now but can also be seamlessly integrated later on, with the system you already have.

Telehealth Solutions

AT NO COST

Our newly enhanced RTConnect solutions now include telehealth and an interwoven virtual phone system that helps you maintain communication with patients, providers and team members within one programmable platform. Additionally, our stand alone telehealth features can be run alongside your current EHR software, allowing you to connect with your patients while also documenting the visit.
