

Virtual Consultation Platform for Eye Health

Telemedicine-based e-consult platform allows optometrists, ophthalmologists and primary care providers to collaborate virtually on eye health cases.

HOW IT WORKS

Create eConsult Request

Create an e-consult request, enter patient's clinical information, observations and upload ocular images or OCT report.

Send eConsult to Provider

Select an eye care provider or specialist and send consultation request electronically. Consulting provider receives instant notification.

Receive Diagnosis & Care Plan

Consulting provider reviews the case, examines images and provides a clinical interpretation and care plan recommendation.

FEATURES & BENEFITS

- ✓ Cloud-based solution
- ✓ HIPAA-compliant and secure
- ✓ Upload fundus and anterior segment images
- ✓ Compatible with all fundus cameras and OCTs
- ✓ Reduce the need for unnecessary face-to-face referral visits
- ✓ Improve turnround time for diagnoses
- ✓ Easily co-manage cases between providers
- ✓ Remotely monitor patient progress
