H5 Matter Analytics® GAME-CHANGING EDISCOVERY ANALYTICS AND REVIEW INNOVATION

Your legal clients now tightly manage to budget and operate with a relentless focus on improving efficiency while managing risk. The eDiscovery process is ripe for innovation and continual improvement, and corporations want their partners to drive innovation and transform eDiscovery into a more cost-effective process. How can you get them the innovation they need and strengthen your long term relationship?

Optimize eDiscovery with H5 Matter Analytics®, an innovation to help you accelerate email review, manage modern eDiscovery risk, and win clients over. Our solution is fully integrated with Relativity®.

ACCELERATE EMAIL THREAD REVIEW

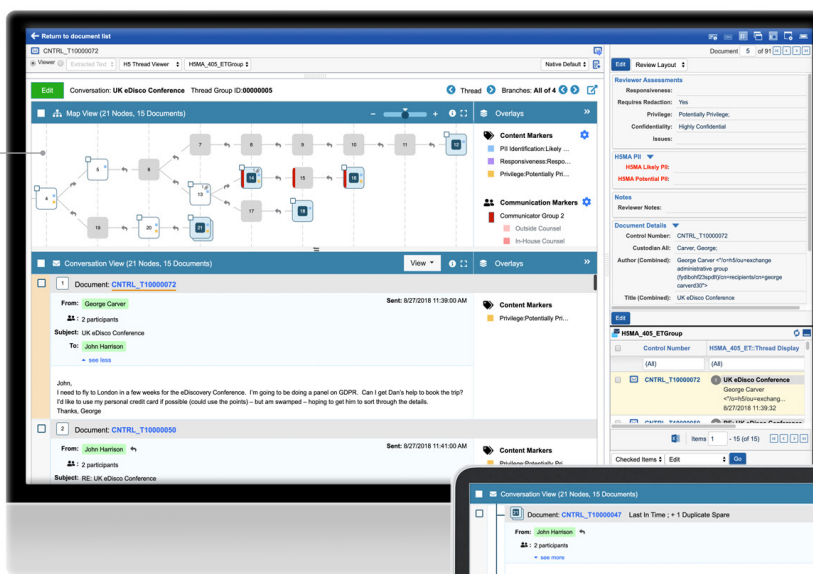

Reviewers spend a lot of time looking at duplicate content in email threads and this drives up document review costs.

H5 Matter Analytics® eliminates up to 70% of email content and helps reviewers make faster relevancy, privilege, PII, and redaction decisions. The result is a faster, more efficient review process and lower costs.

Read up to 70% Less Email Content During Review

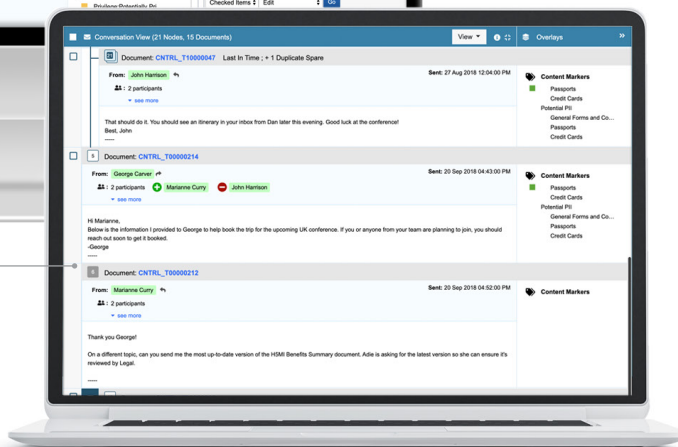

Thread Viewer:

Our email thread viewer shows you relationships in threads and highlights where the unique content resides.

Conversation View:

In our breakthrough viewer reviewers read only the unique content from all branches in context, together as one conversation.

MANAGE MODERN EDISCOVERY RISKS

Attorney-client privileged information, PII, and private health information lurk in virtually every eDiscovery data set.

Our solution identifies lawyers, law firms and legal discussions to reduce the risks of missing privileged information. A tiered potentially privileged data set streamlines review prioritization, and customizable, automated privilege reasons and clean, normalized attorney names makes privilege logging easier.

Sophisticated PII classifiers also identify likely and potential PII, and provide visualization analytics on your data.

“H5’s analytics are very much top of the market, they are unmatched,” H5 Client

— CHAMBERS AND PARTNERS, LITIGATION SUPPORT 2019

WIN CLIENTS OVER WITH INNOVATION

Clients expect you to bring them eDiscovery innovations that will produce better outcomes now and in the future.

After 20 years of advancing eDiscovery with innovative technology and the highest quality linguistic and analytics processes, we are putting the power of H5 Matter Analytics® in your hands.

H5 Matter Analytics innovation helps you (and clients) make email review much more efficient. Plus, with our solution you can see and discuss the precise data set results you’ll get before incurring any licensing fees.

About H5

H5 helps corporations and law firms find and manage the documents that matter in litigation and investigations by providing expert-driven, technological solutions to address the complex challenges created by electronic data. With expertise in eDiscovery, technology-assisted review and search, H5 is committed to helping clients find and manage the information they need to win cases, meet regulatory requirements and address risks by providing creative products and solutions that ensure fast, accurate, cost-effective results.
