

THE MOST FLEXIBLE AND EXPANDABLE LMS & TRAINING MANAGEMENT TOOL

WESTMINSTER, CO - <u>Safety HiveTM</u>, a visionary leader in safety and maintenance management software, announces the release of <u>Training Tracker 2.0</u>. "Building off of the success of the first version of Training Tracker which featured mobile certificates and training path management, version 2.0 introduces a flexible, expandable and customizable learning management system (LMS) allowing users to control the content, look and feel of their learning programs." Says Tristan Jackson, VP of Safety Hive.

Based on an open LMS design, Training Tracker can deliver online learning, virtual reality learning as well as planning and tracking for live training. During this time with unprecedented remote working requirements, Training Tracker offers employers the ability to continue employee training without interruption as well as the opportunity to consolidate and streamline their training programs. Users can choose from the hundreds of online learning courses available from Safety Hive, or they can load their own content, videos or documents for training. The built-in quiz maker allows adding tests, puzzles and quizzes while gamification with points, badges and challenges can be built in to better engage the learners.

Training Tracker's integration with HRIS, CRM and other databases in addition to connecting with safety data and programs in Safety Hive creates a seamless program with 360 degree visibility on safety and maintenance paths, team member engagement and impact on safety programs.
