## holdIT™

## Self-Service Reservations Kiosk

The **holdIT** self-service reservations kiosk extends a library's normal working hours by providing patrons with a pick-up station to retrieve items they've put on hold. Units can be located indoors or outdoors and expanded to include over 200 lockers and an optional returns bin.

The system allows remote assignment and virtual locker load via D-Tech's loaning application. Items are scanned in the application, allocated a locker and recorded on a print receipt with barcode. The receipt lists the items and locker number.

Staff then scans the barcoded receipt at the **holdIT** unit. The unit will automatically unlock the correct locker, and personnel can place the corresponding items inside. Patrons later scan their library card and retrieve items from their assigned locker after following a few

simple instructions on the touchscreen interface.

**holdIT** is compatible with all integrated library systems using SIP2 and comes equipped with choice of barcode, Mifare, RFID or biometric card readers. If the system is used for issuing other types of items, the software works like a self-check system. The user selects the item they wish to borrow, and the system issues it and unlocks the door. If not used with a library's SIP2, D-Tech can supply the unit with its own database or connect to a third-party one.

**holdIT** is available in a wide variety of colors. All models are ADA compliant, meet required safety standards and are accessible for users of any age.

## options

### • Customer-Focused Software

Unique customer-focused software allows patrons to select and “accept” items reserved in their locker. Once accepted, the door gently opens and all items are officially “checked-out” to the patron. An optional receipt can be printed with due dates for each item. Advertising can also be added to the side panels of the **holdIT** kiosk. This feature can be remotely monitored and changed whenever applicable. Libraries can use it to showcase events and display operating hours.

- LED backlighting
- Audio jack plug
- Card payments
- 4 x size locker option
- Returns bin
- Color choice
- staff manager software
- 24/7 CCTV
- Internal and external
