

CyberMaxx™ Listed as a Top Managed Security Service Provider (MSSP) To Watch in 2020 By Cybersecurity Ventures

FOR IMMEDIATE RELEASE

Nashville, TN – May 1, 2020 – CyberMaxx™ is honored to be named a Top Managed Security Service Provider (MSSP) to Watch in 2020 by Cybersecurity Ventures' CyberCrime Magazine.

"The global shortage of cybersecurity professionals is expected to reach 3.5 million unfilled positions by 2021. MSSPs are responding to the labor crunch by providing organizations of all types and sizes with a growing portfolio of services to choose from," says Steve Morgan, Editor-In-Chief of CyberCrime Magazine.

With the onset of COVID-19, the need for cybersecurity expertise has never been greater. Remote work leaves organizations vulnerable to criminals testing networks and pushing PHISHING scams. Healthcare organizations need tailored, and scalable managed cybersecurity solutions to mitigate loss and gain peace of mind.

"What sets CyberMaxx apart from other MSSPs is our proven experience becoming our customer's trusted partner, backed by an over 98% customer retention rate," says Thomas Lewis, CEO and Co-Founder of CyberMaxx. "CyberMaxx experts quickly become teammates that you know on a first-name basis."

With more than **15 years of experience**, CyberMaxx prevents, detects, and responds to cyberattacks for healthcare organizations. CyberMaxx services include endpoint threat detection and response, network-based threat detection and prevention, security information and event management (SIEM) with advanced data analytics, vulnerability risk management, and incident response services.
