

O'Shares Global Internet Giants ETF (OGIG) Grows AUM over \$100 Million on Strong Inflows and Performance +20% Year-To-Date

May XX, 2020 - Boston, MA - O'Shares Global Internet Giants ETF (OGIG) surpassed \$100 Million in AUM and is up over 20% year-to-date through May 8, 2020, outperforming the NASDAQ 100 Stock Index. View the [standardized performance for OGIG](#).

OGIG is designed to own large cap stocks of internet and e-commerce businesses, over sixty stocks selected for strong balance sheets and strong revenue growth.

"OGIG was developed long before the pandemic, to be part of a long secular trend towards e-commerce which was accelerated due to current events, and I don't see that changing," said Kevin O'Leary, Chairman of O'Shares ETFs.

"We did a lot of research and found that revenue growth is one of the best indicators of quality of a business and its stock performance, particularly in e-commerce and internet services so it is one of the characteristics that drives the OGIG portfolio," said Connor O'Brien, CEO of O'Shares ETFs.

[OGIG](#) is the quality and growth internet technology and e-commerce investment provided by O'Shares ETF Investments, a family of ETFs that also includes [OUSA](#), [OUSM](#) and [OEUR](#).

OGIG is an exchange traded fund (ETF) that seeks to track the performance (before fees and expenses) of the O'Shares Global Internet Giants Index (the "Target Index"). The Target Index is a rules based index intended to give investors a means of tracking stocks exhibiting quality and growth characteristics in the "internet sector", as defined by the index provider, O'Shares Investment Advisors, LLC.

O'Shares ETF Investments

O'Shares Investments provides ETFs for long-term wealth management, with an emphasis on quality across our family of ETFs. The O'Shares ETFs are designed for investors with objectives ranging from wealth preservation and income to growth and capital appreciation. Each O'Shares ETF reflects our rules-based investment philosophy, including quality as an important characteristic. O'Shares ETFs are all managed according to rules-based indexes, and all are listed on the New York Stock Exchange.

The outbreak of COVID-19 has negatively affected the worldwide economy, individual countries, individual companies and the market in general. The future impact of COVID-19 is currently unknown, and it may exacerbate other risks that apply to the Fund.

Press Release

Past performance does not guarantee future results. Short-term performance may often reflect conditions that are likely not sustainable, and thus such performance may not be repeated in the future.

Before you invest in O'Shares ETF Investments Funds, please refer to the prospectus for important information about the investment objectives, risks, charges and expenses. To obtain a prospectus containing this and other important information, please visit www.oshares.com to view or download a prospectus online. Read the prospectus carefully before you invest. There are risks involved with investing including the possible loss of principal.

Concentration in a particular industry or sector will subject the Funds to loss due to adverse occurrences that may affect that industry or sector. The Funds may use derivatives which may involve risks different from, or greater than, those associated with more traditional investments. A Fund's emphasis on dividend-paying stocks involves the risk that such stocks may fall out of favor with investors and underperform the market. Also, a company may reduce or eliminate its dividend after the Fund's purchase of such a company's securities. Returns on investments in foreign securities could be more volatile than, or trail the returns on, investments in U.S. securities. Exposures to foreign securities entail special risks, including political, diplomatic, economic, foreign market and trading risks. In addition, a Fund's investments in securities denominated in other currencies could decline due to changes in local currency relative to the value of the U.S. dollar, which may affect the Fund's returns. See the prospectus for specific risks regarding the Funds.

Companies involved with Internet technology and e-commerce are exposed to risks associated with rapid advances in technology, obsolescence of current products and services, the finite life of patents and the constant threat of global competition and substitutes.

Past performance does not guarantee future results. Shares are bought and sold at market price (not NAV), are not individually redeemable, and owners of Shares may acquire those Shares from the Funds and tender those shares for redemption to the Funds in Creation Unit aggregations only, consisting of 50,000 Shares. Brokerage commissions will reduce returns. The market price of Shares can be at, below, or above NAV. Market Price returns are based upon the midpoint of the bid/ask spread at 4:00 PM Eastern time (when NAV is normally determined), and do not represent the returns you would receive if you traded Shares at other times.
