

Create A Safe Environment While Providing Peace Of Mind For Associates And Guests

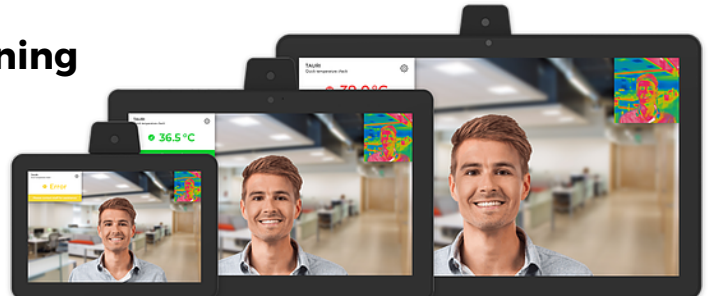

How It Works

The system is calculated with an algorithm to detect body temperature within 3 seconds at a distance within 6 feet.

TempCheck Devices can screen people in many areas such as hospitals, stores, gyms, schools, offices, banks, theaters, restaurants, parks, entertainment and sports venues and retirement living facilities or wherever people gather.

TempCheck Sentinel: Passive Screening

The TempCheck Sentinel is a no-contact infrared temperature sensing system, scanning passersby as they approach.

(TempCheck Sentinel)

(TempCheck Sentry)

TempCheck Sentry: Active Screening

The TempCheck Sentry is a no-contact thermal imaging temperature screening system, using Active Screening with AI, servicing Associates, Vendors, and Guests.
