

ClearSky Delivers iCODE Application-to-Person Messaging Service to Regional Mobile Network Operator Indigo Wireless

Indigo Wireless has engaged ClearSky to provide access to A2P SMS messaging services for their northern Pennsylvania customers. The iCODE® cloud-based service has more than 10,000 interactive SMS campaigns that are now available for Indigo Wireless customers to manage their online accounts, view bank transactions, track packages and interact with thousands of other services powered by application-to-person messaging.

ORLANDO, FL, May 26, 2020—ClearSky Technologies, Inc announced today that MNO Indigo Wireless is now connected to its iCODE® A2P SMS routing service, enabling Indigo Wireless customers access to more than 10,000 enterprise text messaging services. Indigo Wireless is a regional wireless telecommunications company in northern Pennsylvania. As a result of this new engagement, Indigo Wireless customers can now enjoy access to a large and diverse array of enterprise text messaging services to track online accounts, banking transactions, package delivery, and much, much more.

Application-to-Person (A2P) messages are part of a multi-billion-dollar phenomenon and a competitive “must have” for text-enabled subscribers, connecting users with loyalty programs, coupons, customer support, and convenience tools. From the ease of mobile boarding passes and e-tickets, to purchase notifications, shipment updates, two-factor authentication and more, A2P text messaging has become a vital tool for personal travel, finance, and security. ClearSky’s iCODE® service enables MNOs and OTT providers to offer A2P messaging capabilities through a single point of integration. The iCODE® service includes both network interconnections and curated management of text services to provide a comprehensive, turnkey managed solution.

“Our customers expect the same access to SMS content with their Indigo Wireless service as they would with any other carrier,” said Paul Korn, Director of Network Engineering and Operations at Indigo Wireless. “Based on industry reputation and ease of access, ClearSky was the obvious choice to bring this offering to our customers.”

“Indigo Wireless has a highly talented team that works hard to serve the needs of their customers,” said ClearSky CMS President, Ron Willett. “Through close collaboration during implementation, ClearSky was able to quickly and efficiently place Indigo Wireless into production with iCODE, and their customers are already seeing the benefits.

About Indigo Wireless

Indigo Wireless has been serving the Northern Pennsylvania Region for 28 years. Local customers and mobile users from around the world can utilize Indigo's GSM, UMTS and LTE networks and have access to full voice and data services.

As a regional operator, Indigo offers local customer service and retail locations and is an active community organization. Indigo's customers stay better connected locally, nationally and Internationally through Indigo's partner networks. Learn more at www.indigowireless.com.
