Hull's Environmental Services is an industry leader in performing remediation services throughout the U.S. Hull's has a staff of experienced personnel familiar with varying types of environmental remediation projects that focus primarily on decontamination of contaminated sites and demolition of contaminated structures under the following state and federal regulatory agencies:

- National Priorities List (NPL, or Superfund)
- Resource Conservation and Recovery Act (RCRA) Corrective Action
- Underground Storage Tanks (UST)
- Department of Defense (DOD)
- Department of Energy (DOE)
- Other (Civilian) Federal Agencies
- States and Private Parties (including brownfield)

Our management staff includes professional environmental scientists, construction managers, project managers, estimators, project superintendents and foremen with expertise in a wide variety of technical disciplines. Hull's performs the work with our in-house, OSHA 40 hour trained field staff, which includes demolition experts, construction equipment operators and field technicians

- Turnkey remediation (RCRA, hazardous, non-hazardous)
- Sludge removal and solidification
- Post disaster decontamination, restoration and demolition
- Mechanical installations and plant maintenance
- Soil vapor extraction system installation
- Industrial and commercial demolition
- Facility/site closure
- Post-closure monitoring and maintenance
- Soil stabilization, excavation and remediation
