

## ACQUIRE CHAMPIONSHIP TALENT: DOMINATE YOUR COMPETITION

In the brutally competitive world of the NFL draft, the way you turn player information into actionable intelligence determines who has the competitive advantage.

From the front-line scouts to the front office decision makers, Hound TALINT allows your entire Talent Acquisition Chain™ (TAC™) to turn hard-earned scouting data, both quantitative *and qualitative* performance metrics, into interactive universal displays that will guide your team to the best possible talent selection.

Let Hound TALINT expertly work *your* data, so your experts are freed up to do what they do best: assess talent.

## NEXT GEN DECISION SCIENCE IN SPORTS

Our process empowers you to maximize your time on the athletes who most clearly demonstrate the best fit for your organization.

Our patented *Consensei* analytics engine has the unique ability to quantify your talent team's qualitative professional "gut" instincts and combine them with quantitative performance metrics to give a complete picture of the athlete. Our process allows your experts to collaboratively adjust this data to instantly view how their attribute assessments affect a given player's anticipated performance within the needs of your team.

By enabling your entire Talent Acquisition Chain™ (TAC™), to interactively compare the scores of different athletes across the parameters that matter to you, TALINT allows your team to achieve true consensus on the right selection. ***No other sports analytics platform can do this!***

## HOUND TALINT: PERSONNEL PERFORMANCE PERFECTED.

- holistic **personnel** evaluation via quantitative *and* qualitative **performance** metrics
- easy-to-understand visual modeler
- collaborative process leads to consensus across the Talent Acquisition Chain
- guides you to clear and confident talent decisions
- organizational fit **perfected!**

From front-line scouts to front office decision makers, sic **Hound TALINT** on the trail for:

### New Talent Scouting Support

Let TALINT's easy-to-understand visual display help you convey a consistent recruiting portfolio analysis that makes sense to everyone in the TAC. No more explaining what you *meant* because the data will speak for you.

### Current Talent Development and Retention

Let TALINT's comprehensive, bias-free analyses help your medical, strength, and coaching teams maintain your internal talent for peak personnel performance.

### Front Office Talent Negotiation Support

Whether you're considering on-field players, off-field coaches and staff, or executive caliber personnel, let TALINT support your sensitive budgetary decisions with bias-free analyses
