

D3 Security Appoints Spire Solutions as Distributor of Next-Generation SOAR Platform in Middle East and Africa

Partnership accelerates security automation and MITRE ATT&CK adoption in MEA

Dubai, U.A.E.—June 29th, 2020—D3 Security, provider of the leading next-generation SOAR platform, today announced it has appointed Spire Solutions, the Middle East’s preferred security partner, as a value-added distributor in the Middle East and Africa. Under this partnership, Spire Solutions will support the distribution of D3 Security’s NextGen SOAR platform, known for its advanced security orchestration, automation and response (SOAR) capabilities with the MITRE ATT&CK Matrix built in.

With D3 Security’s next-generation SOAR features and partner-centric go-to-market model, distributors play a crucial role in supporting resellers and MSSPs, and driving growth across numerous markets. Spire Solutions, with its carefully selected portfolio of leading IT security solutions, is the ideal partner for D3 Security as it expands its global reach.

“We share Spire Solutions’ dedication to leading-edge technology and recognize the importance they place on deep security expertise,” said Suneel Rangamani, D3 Security’s Sales Director for the MEA region. “Our team is confident that Spire will help us penetrate markets, scale opportunities, and ensure the success of many clients across the Middle East and Africa.”

D3 Security’s mission is to make security operations, incident response, and threat hunting dramatically easier and faster. Today’s SOAR market faces huge challenges around managing playbook lifecycles and product integrations. D3 Security’s NextGen SOAR Platform leads the way with 260+ product integrations and a low-code/no-code interface that makes it possible to build, adjust, and scale playbooks and integrations without extensive Python coding skills. It has also disrupted the market with built-in MITRE ATT&CK TTP automation, enabling SOC operators to see a complete picture beyond the individual stages of an attack.

“Recent moves in the industry have left D3 standing as one of the only truly independent SOAR platforms,” said Sapan Agarwal, Spire Solutions’ Commercial Director. “D3 has embedded the entire MITRE ATT&CK Matrix for automated detection and correlation of attacker tactics and techniques which gives D3 Security a competitive edge over other SOAR technologies. Our consistent efforts to focus on helping customers in the region will only be strengthened by this partnership.”

About D3 Security

D3 Security's NextGen SOAR Platform is the first and only "SOAR 2.0" platform that combines automation and orchestration with the proactive response capabilities of MITRE ATT&CK. D3's codeless playbooks bring enrichment, analysis and remediation together, making it easy for anyone to build, modify and scale workflows, no Python coding required. With hundreds of product integrations and baked in security expertise, customers reduce MTTR up to 99% and improve both the speed and quality of their security operations, incident response and threat hunting.
