

COVID-19 Tracker

Get Back to School...Safely!

As you welcome students back to campus, it's extremely important to take extra precautions. With the Covid-19 Symptom & Exposure Tracker by SchoolInfoApp, you can screen students and other campus visitors before they come to campus to find out if they are currently experiencing any of the known symptoms or if they have been in close contact with anyone who has recently been diagnosed or is experiencing symptoms. Users simply & securely submit their answers directly through your school or district app by SchoolInfoApp and are then instructed if they are cleared to come to campus or not with a custom response to fit your school or district's action plan. All responses are documented, stored securely and available for administrative review, oversight and attendance record comparison. "Yes" answers generate a notification to the proper school personnel for proactive action. Concerned about your younger students? Parents or guardians can even be authorized to answer for their children.

Get back to school safely with the Covid-19 Symptom & Exposure Tracker by SchoolInfoApp.
