

A North American Leader in High-End Finishing

The Vision Coatings Story

In late 2018, we opened for business in a new custom-build facility as a Sunview Patio Doors spin-off.

Over the years, our finishing capabilities grew into a world-class operation. The Vision Group realized these services would be valued by a wider range of window and door manufacturers, and possibly others.

Since then, we have rapidly grown and with expanded capacity with a fast-growing list of new clients.

The UV ToughCoat Advantage

As one of the first in North America to utilize this revolutionary technology, we recently installed our second UV ToughCoat production line. These are significant investments, but they help us raise the bar in terms of flexibility, turn-around time, quality, and durability.

Company Highlights

- Part of the Vision Group of Companies
- AAMA 615 certified finishing and coating services to window/door fabricators and others
- Operating in a 50,000 sq. ft. facility, including a 2,000 sq. ft. custom-designed spray booth enclosure
- 2 x UV ToughCoat systems - leading-edge, fully automated coating technologies
- Over 10M linear feet of finished product per year
(capacity now higher with a 2nd UV ToughCoat line)

Key Benefits

- Fully self-contained advanced coating solution
- Significantly harder finishes than conventional paint
- Combination of technology, process, and exclusive materials
- Faster “instant cure” turnaround times
- Clean, dust-free finish with a more durable coating
- No VOCs or Harmful Air Pollutants (HAPs)
- UV-stable through lower heat absorption rates
- Tested to conform to the AAMA 615 standard for superior performing organic coating on plastic profiles
