

#1 External Application

APEX Community

A Powerful Community Engagement Solution

Apex Mobile's Community Engagement platform is an industry leading tool built from the ground up to drive deeper connections between agencies and the communities they serve. Our mobile first community engagement product empowers agencies to provide their residents with up-to-date agency activities, the ability to receive instant push notifications, send anonymous tips, view wanted and missing persons, look up sex offenders, examine crime maps, access agency contacts, subscribe to community message boards, and much more. Beyond the dozens of pre-built features immediately available, our platform can be fully customized with features designed specifically for your community.

Why Pay More for Less?

The deployment of an app for your agency should not be a laborious and time intensive process. Any company that leads you to believe so is either not very technologically proficient or is just adding a "Government Agency" tax that is simply unnecessary. We're proud of our proven ability to offer a superior product at a fraction of what many of our competitors charge.

The Benefit of Joining the Apex Mobile Community Engagement Network

When your agency partners with Apex Mobile, you are joining a growing community of like-minded public safety professionals who are all working together to leverage technology to solve common challenges. As the community develops new features, they are rolled out to plans across the network at no additional charge.

100% SATISFACTION

Our team is ready to keep working until your agency is completely satisfied.

Unlimited Customizations

We've built the platform to evolve with your agency. Our unique "fully managed self-service" model provides your agency, at no additional cost, with unlimited customer support along with the ability to be as hands-on in the management of your applications as you feel comfortable with. We'll give you the keys to the system but will always be an email or phone call away to assist with any need, great or small.

Fast Turn Around and **Minimal to No** IT Involvement Needed

We make onboarding as easy as possible. Users will only be asked to create a developer account for Google and IOS. Once you have created your developer accounts, our team will take it from there. The only IT involvement would be if you'd like us to integrate your app with an internal system. Our current record from initial call to live apps is held by a Sheriff's Department in Texas. They called on a Monday and their apps were live by Thursday morning.

#1 Internal Application

APEX IRIS

Mobile First Internal Reporting and Information Sharing Platform

Get your agency on track and on the same page with the Apex IRIS platform. Via mobile apps and a web interface, Apex IRIS provides dozens of public safety focused features right at your fingertips. Features such as a virtual roll call, bulletins, phone directories, alerts/notifications, groups, and much, much more!

With Apex IRIS, new features are made available to our clients at no additional cost. We work with your agency to manage and configure your apps to meet your evolving needs. You'll have the keys to the system allowing for unlimited customization.

Built by a Network of Public Safety Officials

Join our community of like-minded public safety officials who are all working together to help create problem solving technology solutions designed to resolve real day-to-day communication issues.

Unlimited User Customization Options

One-size-fits-all just does not work in today's dynamic public safety environment. Easily create and link content to build a truly one of a kind application tailored to your agency's needs.

24/7 Customer Care

We believe every customer request is mission critical and work hard to provide reliable and fast responses.

Revolutionary Public Safety Communication in the Palm of Your Hand

The Apex IRIS platform is a mobile-first solution for policy and Information distribution. Your agency finally can fill the critical communication gap between email & radio via our proprietary iOS and Android compatible apps and integrated web portal. Share operational and critical information via easy-to-read feeds that are accessible across all platforms. Our industry-leading communication platform allows for user grouping, public and private feeds, and gives your organization access to powerful push notification capabilities. Data is secured via in-transit and at-rest encryption with all sensitive information stored on the AWS GovCloud.

Efficiency-Driven Technology that Ignites Your Agency's Productivity

Digital Roll Call
Provide critical briefing information across all platforms

Agency Feed
Consolidate targeted operational updates in one location

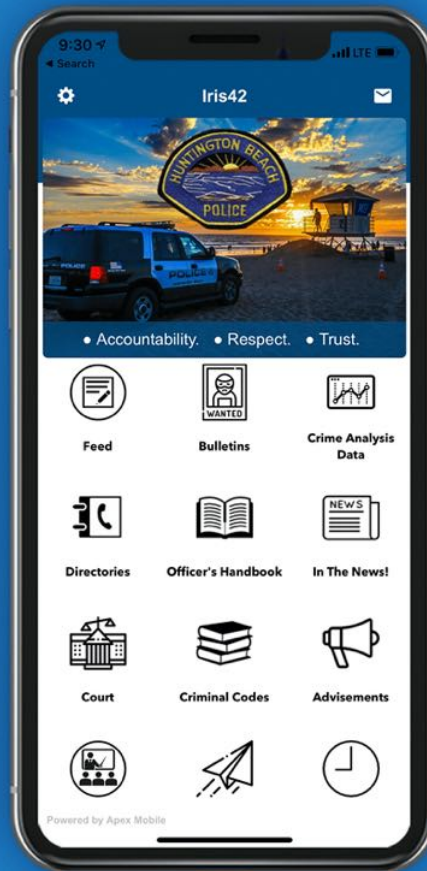

Bulletins & Notices
Distribute, categorize and search bulletins, notices and crime analysis data

Checklists
Create policy-driven, interactive custom checklists

Enterprise Distribution
Distribute your app directly and away from the public app stores

Digital Document Delivery
Provide documents and information to the public via text and email

Push API
Automate app notifications from internal systems

User Groups
Unlimited use of user groups to organize agency communication and resources

Directories
Dynamic directories provide click to call and email functionality

And Much More
Dozens of live features with more on the way provide unlimited options

Fast Turn Around and **Minimal to No** IT Involvement Needed

We make onboarding as easy as possible. Users will only be asked to create a developer account for Google and IOS. Once you have created your developer accounts, our team will take it from there. The only IT involvement would be if you'd like us to integrate your app with an internal system. Our current record from initial call to live apps is held by a Sheriff's Department in Texas. They called on a Monday and their apps were live by Thursday morning.

APEX MOBILE FAQs

What support will we receive once the app is published?

Our unique “fully managed self-service” model provides your agency, at no additional cost, with unlimited customer support along with the ability to be as hands on in managing your application as you feel comfortable with. We’ll give you the keys to the system but will always be an email or phone call away to assist with any need, great or small. Additionally, when your agency partners with Apex Mobile, the launch of your app is just the beginning. We’ll proactively work with you on an ongoing basis to ensure you’re getting the most from your application.

How is content updated?

This depends on the feature. A web-based content management system updates features that are entirely powered by our platform. Certain integrations like crime maps, jail lookups, and sex offender maps are typically updated via a file that is pushed over to our system by the agency’s IT department on a weekly or daily schedule.

What is the annual fee beyond the initial cost?

We have three plans. Apex Community Core is \$975/yr. Apex Community Plus is \$2,450/year. Apex Community Pro is \$7,500/yr for year one and then \$3,500 for years 2+. Your annual fee ensures you always have the latest version of the app and gives you access to new features as they are released.

What is the turnaround time on the creation of the app?

Our record for deployment is three days from initial contact to apps being live in both the Apple and Google app stores. You will need to set up developer accounts with both Apple and Google. Apple requires a couple of steps to verify your account when you first create it, and this can take a few days.

How do you work with 3rd party products and what is required of us?

We do our best to handle as much of the work as possible when integrating our client’s apps with 3rd party features and data. If you can get the data to us, we’ll figure out how to include it in your app.

Do we own the content and all accounts created if we need to transfer to a different vendor?

Yes! All of the content in your app is yours, and the apps will be submitted under developer accounts that your agency controls. While we’d hate to see you go, if you did need to move to another vendor or if you took over the app internally, the transition would be seamless for your app users. On their next update, they’d have the new app.

How much involvement is required from our IT department?

In most cases, there is minimal to no IT involvement needed. Once you have created your developer accounts, our team will take it from there. The only time significant IT involvement may be needed would be if you’d like us to integrate your app with an internal system.

How do you offer so many features at such a low price?

We’ve been developing technology platforms for over a decade, and we’ve put the lessons we’ve learned into Apex Mobile. The deployment of an app for your agency should not be a difficult and time-intensive process. Any company that leads you to believe otherwise is either not very technologically proficient or is just adding a “Government Agency” tax that is simply unnecessary. We’re proud of our proven ability to offer a superior product at a fraction of what many of our competitors charge.
