Lab Alley Products Are Helping To Open Up America Again

Austin, TX – Lab Alley (www.laballey.com) has been protecting American lives and getting people back to work through selling raw materials and chemicals online that help create antiviral products, hand sanitizer ingredients, and virus disinfectants. Americans are practicing social distancing and using Lab Alley products to help reduce the risk of exposure to the virus that causes COVID-19. Chemical disinfectants ordered in bulk at LabAlley.com are being used to disinfect public spaces and to help open up America again. “Lab Alley has always made the well-being and health of Americans a priority. Throughout the battle against COVID-19, our company has worked hard to get Americans back to school and work”, says Fred Elabed, CEO of Lab Alley LLC.

Americans that own businesses, manage schools or simply want to ensure the cleanliness and safety of their home are going online to LabAlley.com to buy commercial cleaning supplies and chemical ingredients to make antiviral disinfectants, sprays, and household cleaning products. Lab Alley has been helping American businesses as they face historic challenges during the COVID-19 pandemic. Virus disinfectant ingredients such as ethanol (ethyl alcohol), sodium hypochlorite, hydrogen peroxide, hydrochloric acid, thymol, sodium chloride, citric acid, benzalkonium chloride, triethylene glycol, and isopropyl alcohol ordered on the Internet at LabAlley.com can be used for disinfection of common and high-traffic areas.

During the COVID-19 pandemic, Lab Alley has been shipping raw materials and chemicals for virus disinfectants to healthcare firms, restaurants and bars, schools, youth programs and camps, workplaces, childcare programs, and public transportation operators. Products ordered online at LabAlley.com are helping to open up community settings, gyms, salons, government agencies, schools, retail establishments, and overall businesses.

Cleaning of visibly dirty surfaces followed by disinfection is one of the best practice measures for prevention of COVID-19 and other viral respiratory illnesses in households and community settings. Americans are using Lab Alley products to routinely clean and disinfect to maintain a safe environment. Americans are buying sanitizers ingredients at LabAlley.com to help fight coronavirus at home and to clean and disinfect high-touch surfaces.

American businesses are buying 3%, 6%, 10%, 30%, 32% and 34% concentrations of hydrogen peroxide at LabAlley.com and diluting it to a 1.4% solution to help disinfect facilities. American consumers are purchasing USP Grade Isopropyl Alcohol in 91% and 99% concentrations online at

LabAlley.com and diluting it to a final concentration of 75% for hand sanitizers. Some of the chemicals sold by Lab Alley can help contain the spread of COVID-19 such as 70% ethanol, 95% ethanol and 100% ethanol. High quality chemicals that go into virus disinfectants can be ordered in 1-gallon bottles, 5-gallon pails, 55-gallon drums and 250-gallon totes online at LabAlley.com. The ability to offer a wide variety of sizes has helped meet the increasing demand for alcohol-based hand sanitizer ingredients during the COVID-19 pandemic.

Active ingredients ordered at LabAlley.com are used to manufacture alcohol-based hand rubs (ABHR) and disinfectant products for safely fighting against COVID-19. Even as the U.S. sets new records for coronavirus cases, products bought online at LabAlley.com are being used to open up America and to help keep supply chains running. By providing crucial raw materials and chemicals that produce antiviral products and virus disinfectants, Lab Alley is helping the U.S. to combat the spread of the coronavirus pandemic.

Chemical ingredients sold at LabAlley.com are being used by business owners, health professionals and the public to formulate and compound products suitable for use during the COVID-19 crisis. More and more Americans are shopping for hand sanitizer and disinfectant ingredients at LabAlley.com that potentially combat the spread of viruses, including the coronavirus (SARS-CoV-2), the flu virus, and the common cold virus. The EPA and the CDC are also helping to open up America again by providing guidance for cleaning and disinfecting spaces where Americans live, work, and play. Lab Alley products are helping businesses of all types and in all regions reopen and evolve during the post-coronavirus pandemic. Lab Alley products are being used to safely reopen America's schools, help people return back to their place of work, and reopen the economies of all 50 states. Lab Alley is currently shipping tons of raw materials and chemicals that go into antiviral products and virus disinfectants to Sun Belt states each week.

Lab Alley is an "essential business" during COVID-19 providing sanitizing and disinfectant chemicals to hospitals, healthcare, personal care/health & beauty/cosmetics, healthcare workers, first responders, medical providers, universities, governments, businesses, and consumers.
