

About

At the BTC Times, we deliver content with a mission:

- Quality reporting of the news you care about
- Covering stories that others don't
- Addressing FUD and bad takes in the media

The BTC Times offers daily coverage of the news and development surrounding Bitcoin and other cryptocurrencies. Through reports, deep-dives, and op-eds from subject matter experts, we aim to capture the economic, political, and social impact of these technologies.

The BTC Times covers the crypto space with diligence and provides you with the information you need to form your own opinion. We counter the news that prioritize clicks over accuracy with the facts that set the record straight. In comprehensive, authentic coverage, we seek to capture the impact of Bitcoin and how it is transforming the future of money.
