

Creation Technologies Breaks Ground on New Manufacturing Facility in Hermosillo, Mexico

BOSTON, MA – August 27, 2020 - Creation Technologies, an end-to-end, scalable Global Electronic Manufacturing Services provider, announced today that it is expanding the Hermosillo operation with a new, state-of-the-art facility. The company is making a strategic investment to significantly expand its North American footprint to better serve Aerospace & Defense, Medical, and Tech Industrial customers.

“We are thrilled to announce our plans for a significant expansion of our manufacturing capacity in Mexico,” said Stephen P. DeFalco, Chairman and CEO of Creation Technologies. “This expansion builds on our current Mexico operations where we have over 700 dedicated employees focused on providing outstanding service to our customers’ high reliability needs.”

The new facility will provide significantly more capacity with a total of 205,000 square feet which will bring the total capacity of our Mexico operations to 330,000 square feet and complement the company’s existing capabilities in Mexicali. It will have space for up to 12 highly automated SMT lines and will be a purpose-built greenfield facility designed for lean factory flow with the most modern manufacturing equipment. The new manufacturing site is located three kilometers from the company’s current Hermosillo facility, providing a smooth transition for employees and existing customers, and is scheduled to be operational in Q3 2021.

In addition to offering efficient product flow, the new facility will provide fully integrated EMS solutions, including dedicated areas for PCB Assembly, System Integration & Test, as well as Forward and Reverse Logistics.

About Creation Technologies

Creation Technologies (www.creationtech.com) provides total electronics product lifecycle solutions including turnkey design, rapid prototyping, manufacturing and fulfillment to support its high reliability customers around the world. The company of approximately 3,200 employees operates ten manufacturing locations, two design centers and a rapid prototyping center in the USA, Canada, Mexico and China. Its OEM customers are in the Aerospace & Defense, Medical, and Tech Industrial markets.
