## **Cat® Simulators Offers New Compact, Portable Training with SimLite Excavator**

Peoria, Ill.— Simformotion™ LLC – a leader in heavy equipment simulator training solutions –announces the release of the new Cat® Simulators System, SimLite Excavator. The new compact and portable system allows instructors and learners to utilize the training inside of the classroom at socially distanced stations or travel off-site with users.

Set in a city construction environment, the system teaches heavy equipment operation skills for the excavator—a machine found on construction sites worldwide. Correct operation leads to increased safety, production and cost savings. Simulation teaches learners with a hands-on and consistent experience. Learners can train in remote locations anytime and anywhere.

“We’ve heard from schools, training centers and businesses—they have to keep training, despite the pandemic. So that meant engineering a design compact enough that it could travel easily in pelican cases; or be set up in classrooms at a safe distance,” says Simformotion CEO Lara Aaron. “All of the things people love about Cat Simulators is packed into SimLite, including OEM controls and our exclusive reporting program, SimU Campus™.”

SimLite is built on a standardized platform and designed as a self-contained educational tool deployed through hardware and software that does not require internet connectivity to use the system. SimLite includes exercises that teach how to perform a walkaround inspection, principles of loading, raking, maneuvering the machine around a worksite in tight spaces, and trenching. Plus, an open training mode in each exercise offers opportunities for additional practice, skill refinement, and recreating site-specific scenarios for training. The system is available in multiple languages.

To accompany SimLite, a complete curriculum is available online. It can be used in the classroom or for remote learning. It’s a turn-key solution complete with instructor guides, lessons, videos, quizzes, tests and more.

In addition to the new SimLite Excavator, Cat Simulators are available in 17 other models for the construction, mining and forestry industries. Cat Simulators are the only Caterpillar-licensed simulator brand on the market. Visit [www.catsimulators.com](http://www.catsimulators.com) for information on SimLite Excavator.

Cat<sup>®</sup> Simulators new SimLite Excavator is compact and portable. The system can be used to set up socially distanced stations in classrooms or travel home with users.

#### About Simformotion™ LLC

Simformotion™ LLC is a leader in heavy equipment simulator training solutions. Simulation can help address initiatives such as safety and production; while ensuring training can be delivered anytime day or night, regardless of weather conditions. Cat Simulators are chosen as training solutions in such markets as mining, construction, forestry, government, and trade and vocational schools. Simformotion™ LLC is a licensee of Caterpillar Inc. As used herein, “Simformotion” means Simformotion™ LLC, a Delaware limited liability company.
