

Return to work. Safely.

Ensure the health and safety of your employees as you reopen and operate during the COVID-19 pandemic.

Employee Wellness Made Simple™

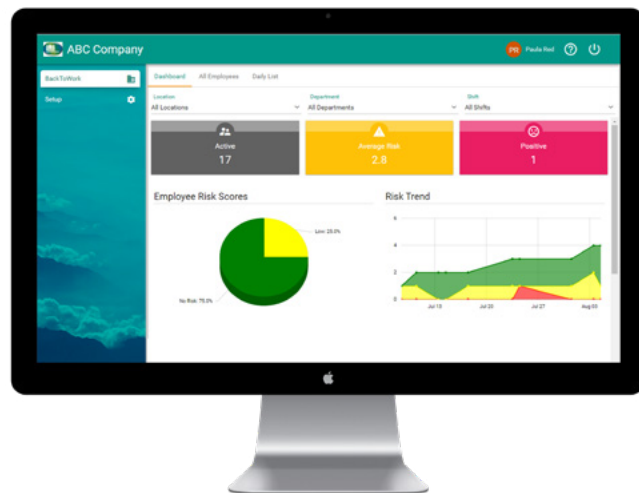

You're committed to safety. We're committed to helping you manage and track employee coronavirus health status.

- + Health symptom checker and questionnaire generates a calculated personal risk score
- + Dashboard monitors and trends
- + Platform integrates with most laboratories to populate lab test results
- + Intuitive, HIPAA-compliant solution built on the Google Cloud Platform
- + Available in English and Spanish
- + 22+ years of hospital, physician and lab connectivity expertise

COVID-19 Employee Wellness Management

Maintaining productivity requires a work environment where employees feel comfortable returning to work and employers can mitigate risks to support the ongoing prevention of COVID-19. Easily monitor and report on COVID-19 related symptoms with the 4medica COVID-19 Employee Wellness Management™ solution.

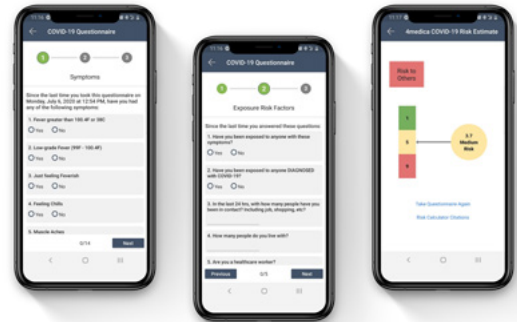

The health symptom checker links to a wellness health questionnaire and optional lab test results available through connected diagnostic labs. Together, these functions calculate a risk score that validates the employee's coronavirus health status every day or as frequently as you like. And, personal data is kept confidential to ensure active employee participation.

When employees are confident to return to work, businesses operate more smoothly.

Manage and track employee health status

Employees are prompted to complete a short, easy-to-answer health survey to generate a personal risk score, visible only to the employer. The employee is ranked low, medium or high health risk and is subject to precautionary safety measures—as established by the employer. A robust dashboard offers a variety of reporting options with data and statistics filtered according to employer preferences.

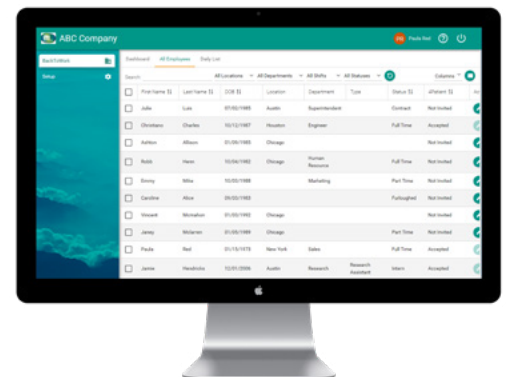

Easy to use, customizable and affordable

- Easy-to-implement intuitive platform alleviates IT complexities—no need to engage your IT staff
- Employees use the zero downtime app on their smartphone, tablet or desktop computer
- Build custom protocols aligned with corporate and legal policies for coronavirus testing
- Modify processes and procedures as recommendations change over time
- Dashboard shows your employee population in testing and risk categories
- Lab testing assistance with a network of diagnostic labs and pre-arranged lab testing locations

Trust and transparency

Since we've handled patient lab data securely and reliably for 22+ years, we're seriously committed to ensuring safety and compliance through reasonable measures to protect health data against loss, theft, misuse and unauthorized access.

- Solution design, protocols and wellness questionnaire are based on CDC guidelines for COVID-19 exposure and risk factors.
- Secure authentication procedures ensure every employee login is properly set up.
