

Newest Business Growth Tool for Solar Companies

Lehi, UT - JobNimbus is excited to announce the launch of their back office solution for growth into the solar market. Jobnimbus is software that will track your projects from lead to after installation. The official launch is set for October.

Having worked with multiple solar companies, they spoke with current customers asking what their original platform was missing and put together a new version specifically for those in the solar industry. After being surveyed, it was found that JobNimbus solar customers have seen, on average, [25% revenue growth, 208 hours saved per company per week, and decrease in contract to installation time by 36%](#).

“We went from a 140 day turnaround time, from contract to funding to installation, to 89 days with JobNimbus.”

Rey Alonzo, Corporate Operations at [LIFT Energy](#)

JobNimbus has been around for seven years, originally focusing on the roofing industry but plans to make the same impact for solar business across the country.

“We’re wanting to make the solar business owner the hero. Our software will make it easier for them to continue to change their customer’s lives with solar energy, while scaling their business.”

[Ben Hodson, CEO of JobNimbus](#)
