Trideum Corporation announces the promotion of Favio Lopez to President and Chief Operating Officer

HUNTSVILLE, Ala., October 30, 2020 -- Trideum Corporation announced the promotion of Favio Lopez to President and Chief Operating Officer (COO).

Favio came to Trideum upon retiring from the United States Army. During his distinguished military career, Favio served in various command and staff positions deploying to the middle east and Haiti as an Armor officer. His love of training led Favio to select FA57 Simulation Operations while stationed at Fort Leavenworth, Kansas. During his time as a FA57, Favio served in a variety of roles, including Combat Developer, Instructor Proponent Officer, and finally as the Project Director for the Cross Command Collaboration Effort (3CE) for Program Manager Future Combat Systems. The 3CE effort brought together over 50 sites to enable distributed testing, experimentation, and training.

Following retirement in 2009, Favio joined Trideum holding numerous positions including, Program Manager, Director, and most recently, COO before his promotion to President. His understanding of the technologies involved, the importance of human-centered design and engineering, along with his business acumen and optimistic outlook are among the leadership skills that he will employ in his continued leadership at Trideum.

Favio recently led the realignment of the company to better define and focus on our current customers, and has been instrumental in increasing prime contract awards while maintaining and growing strategic partnerships.

Van Sullivan, Trideum's CEO said, "Favio is deserving of this promotion. He ensures Trideum maintains its focus on our employees, customers, and communities all while continuing to drive growth. His leadership and experience will guide Trideum into the future."

About his promotion, Favio said, "I am humbled to be Trideum's new President. I am surrounded by talented employees that embody our values of sacrifice, stewardship, and servant leadership. Our commitment to delivering innovative solutions to our customers has enabled our growth. I am committed to our focus on our employee family and continuing our partnerships with our customers and industry teammates."

Favio holds a Master of Science degree in Industrial Engineering from the University of Central Florida and a Bachelor of Arts in International Relations from Canisius College.

Apart from his work and volunteering, Favio enjoys spending time outdoors and vacationing with his family.

About Trideum: Trideum Corporation is a premier Test and Evaluation, Training, and User Experience company.
