

## Machinery Safety and Risk Assessment Services

**30+ Years of Successful Product Safety Partnerships**

### Trusted Expertise

Our hands-on approach to interpreting standards and implementing best practices has proven effectiveness. In our work with over 15,000 companies, zero Clarion Safety clients have faced warnings-based allegations.

### Unparalleled Credentials

Our team not only understands the applicable ANSI and ISO standards for product safety and risk, we're involved at the leadership level on many key national and international committees – and we put that knowledge into practice for each client.

### Your Partner in Safety and Compliance

Safety and risk reduction are top concerns for today's product manufacturers. There are so many elements involved in bringing a safe, compliant piece of equipment or machinery to market. And, there is so much on the line if one aspect breaks down and people are put in harm's way.

Our Clarion Safety Assessment team is here to help identify, remedy and prevent issues in your product safety strategy. We're committed to being your partner every step of the way, in line with your specific needs – including risk assessments throughout your product's lifecycle, specifying safety requirements like machine guarding, best practices for manuals and warnings, litigation support and more.

### Quality, Personalized Service

Our trusted risk assessment resources are powered by Clarion Safety Systems, where we have over 30 years of experience working hand in hand with clients to apply product safety best practices to identify and mitigate risks – for manufacturers and machine users alike. With our full-service product safety and liability prevention capabilities, and our approach of using a team of experts each with specific areas of proficiency, we can help you navigate your challenges with confidence.

**Reduce Risk,  
Save Money and  
Increase Safety**

## **What Does Clarion Safety Assessment Offer?**

When machines heat, cut, or compress, potential hazards exist. A split second is all it takes for someone to put a hand where it doesn't belong. The consequences can be tragic – and the stakes are high. That's why we help engineers, lawyers and other product manufacturing stakeholders to easily bring safe, compliant equipment and machinery to market.

### **Our Services Include:**

- ✓ **Machine Risk Assessments:** Implement today's best practices into your risk assessment process – the foundation of an effective product safety program.
- ✓ **Warnings and Label Reviews:** With a personalized review of your product safety labels, learn tangible optimization techniques to put to use in your warnings and instructions.
- ✓ **Consulting:** Whether you're looking to put your product safety program to the test or have known issues but are unsure where to begin, our experienced safety consultants can help.
