# fourleaf®

Software as A Service Designed for Your Unique Healthcare Business Needs Needs

fourleaf®, an innovative suite of tools for healthcare payors and providers, is a solution that simplifies the management of ALL provider data in a centralize location delivering a more efficient workflow that reduces risk.

fourleaf® creates a fully integrated system to ingest and validate provider data, deliver electronic contracting solutions, and manage documents while providing a system to track tasks and assignments to ensure providers are onboarded and managed swiftly and appropriately. The functionality of the system is easy to use and seamless in its delivery. From validating provider data through roster ingestion, file curation, and analytical reports, to the system's capability to integrate contract and email templates, **four**Leaf® will make management of provider information flawless.

fourLeaf® is secured with Microsoft Azure Services and is hardened with policies established by the National Institute of Standards and Technology.
