

The Future of Digital & Paperless Manufacturing is Here. Don't Be Left Behind.

Work Safe. Work Smart. Work Better.

Real-time Data to Improve Your Bottom Line. Do More with Our SaaS-based Solution.

- INCREASE Productivity and Profitability
- INCREASE Intelligent, data-driven decisions
- INCREASE Worker collaboration and accountability
- INCREASE Workplace safety
- REDUCE Downtime and Cost
- REDUCE Paper Processes and Job Travelers
- REDUCE Wasted time and mistakes
- REDUCE Employee illness and injuries

In Partnership With:

Our Technology

DIGITAL JOB TRAVELER

Integrate workstations into one job, project and/or order. Digitize and replace paper job travelers and their related paper documents.

NOTIFICATIONS (ALERTS)

Management can set "notifications" (alerts) that can be sent based on any activity or inactivity. Workers can alert management if they have an emergency, need assistance or are taking a break.

DIGITAL TASK LIST

Digital versions of paper work instructions making tasks multimedia-driven where you can embed all types of content – voice, video, images – to enable a more dynamic experience.

REPORTS AND DASHBOARDS

Create reports and dashboards on full jobs, workstations and individual people. Accumulate data digitally in ways paper can't.

REAL-TIME NOTICES

Real-time notices can be sent to specific workers, workstations or groups.

LANTERN

Pause work for an emergency, maintenance, assistance or just a break alerting supervisors with the touch of a button.
