A New Positive Identification Solution for Individuals that Authenticates they have been vaccinated while maintaining their Privacy

CREATING SECURE HD BARCODES

HD Barcode can embed encrypted Photographs, Biometric Data, and Medical information that can only be Decoded by Authorized Smartphones with the Matching Security Key

(Video Link for Biometric Authentication below)

<https://drive.google.com/file/d/1nWDBgKpt-tirhio0IKoVyFMifMeaSfMy/view>

HD BARCODE TECHNOLOGY PROVIDES A CODE GENERATOR FOR EACH AGENCY, MANUFACTURER, OR CUSTOMER ALLOWING EACH TO CREATE THEIR OWN SECURITY CODES THAT ONLY THEIR AUTHORIZED READERS CAN DECODE.

- Public HD Barcode (any reader can scan and read the symbol)
- Company Private HD Barcode (only authorized readers can scan and read the symbol)

WHEN VACCINATED, ALL PERSONAL INFORMATION CAN BE CUSTOMIZED AS REQUIRED TO AUTHENTICATE THE INDIVIDUAL, INCLUDING A PHOTOGRAPH EMBEDDED IN THE HD BARCODE.

The screenshot displays the 'HD Barcode' application window, titled 'Vaccination Data Entry Form'. The interface is divided into several sections:

- Admin Login:** Located in the top-left, it includes fields for 'Username' and 'Password', and buttons for 'Login', 'Logout', and 'Settings'.
- Add New Fields:** A sidebar on the left allows users to manage the form's structure. It lists fields under two categories: 'Vaccination Authentication' (Person Administering Vaccination, Where Administered, Date of the vaccination, Type of Vaccination) and 'Personal Information' (Person's Name, Person's Address, Person's D.O.B., Date of the vaccination, Photograph of the Person, Biometric Information).
- Main Form:** The central area contains the data entry fields:
 - Input fields for 'Full Name' and 'Unique Identifier'.
 - A red header for 'Vaccination Authentication' followed by fields for 'Person Administering Vaccination', 'Where Administered', 'Date of the Vaccination' (dropdown), and 'Type of Vaccination'.
 - A red header for 'Personal Information' followed by fields for 'Person's Name', 'Person's Address', 'Person's D.O.B.', 'Photograph of the Person' (with an 'Upload' button and a camera icon), and 'Biometric Information' (dropdown).
- Footer:** At the bottom, there is a 'Form Size' indicator, 'Reset Form' and 'Submit' buttons, and a 'Print/Export Codes' button on the right.

A red warning message at the bottom of the main form reads: **Information is Deleted Once the Barcode is Printed**.

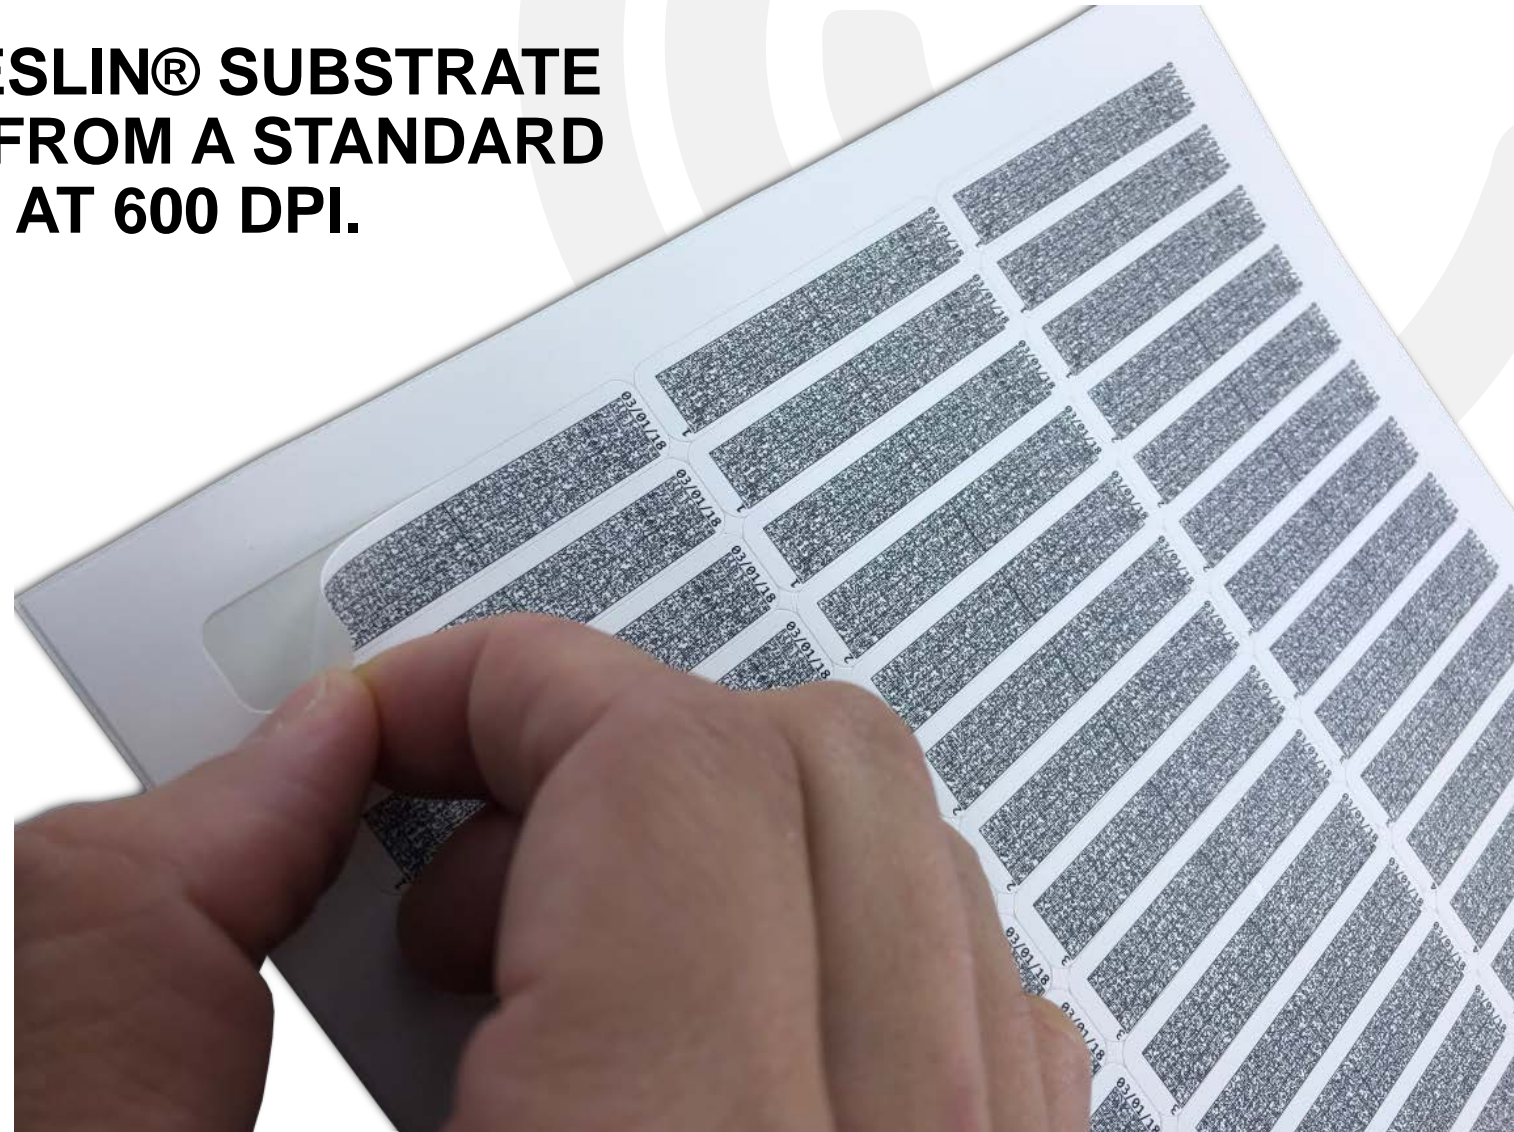

ONCE THE DATA IS ENTERED AND THE CODE CREATED, THE INFORMATION IS DELETED FOR PRIVACY

The screenshot displays the 'HD Barcode' web application interface. The main window is titled 'Vaccination Data Entry Form'. On the left, there is an 'Admin Login' section with fields for 'Username' and 'Password', and buttons for 'Login', 'Logout', and 'Settings'. Below this is an 'Add New Fields' section with a list of form fields categorized under 'Vaccination Authentication' and 'Personal Information'. The main form area contains the following fields:

- Full Name (text input)
- Unique Identifier (text input)
- Vaccination Authentication** (Section Header)
- Person Administering Vaccination (text input)
- Where Administered (text input)
- Date of the Vaccination (dropdown menu)
- Type of Vaccination (text input)
- Personal Information** (Section Header)
- Person's Name (text input)
- Person's Address (text input)
- Person's D.O.B. (text input)
- Photograph of the Person (camera icon and 'Upload' button)
- Biometric Information (dropdown menu)

At the bottom of the form, there is a 'Form Size' slider and buttons for 'Reset Form' and 'Submit'. A red text overlay at the bottom of the form reads: 'Information is Deleted Once the Barcode is Printed'. In the foreground, a hand is holding a printed barcode sticker with a grid of data points.

WATER RESISTANT PPG TESLIN® SUBSTRATE LABELS CAN BE PRINTED FROM A STANDARD DESKTOP PRINTER AT 600 DPI.
