

VoIP Calling for Telegram Users

Hosted White Label Solutions for VoIP Service Providers

Leverage the Power of Social Media with VoIP Calling for Telegram Users.

Telinta offers a brandable solution enabling you to offer VoIP calling to Telegram users around the world. With millions of users, Telegram is one of the fastest growing global social media platforms. Users can invite their Telegram contacts to use your service, helping your VoIP business go viral.

By integrating our softswitch with Telegram, Telinta provides you with powerful cloud-based tools to offer VoIP calling via Telegram's mobile app and its PC/MAC/Linux version for desktop computers and laptops. Using a brandable "bot" your users can easily place calls to any PSTN phone numbers in the world. They can also receive calls from mobile and landline phones right on their Telegram app. Inbound calls use your own DIDs. Options for free on-net peer-to-peer calling, as well as call recording are also available. This unique white label solution is an attractive part of the global Telegram ecosystem.
