

Location Tech harnesses the power of wireless networks and IoT (Internet-of-Things) technologies to deliver panic button solutions for hotels, resorts, and casinos that help meet the (AHLA) criteria for enhanced guest and employee safety.

Panic Buttons

- On-premises network means no blind spots
- Alerts your security people wirelessly with exact location (floor + room number)
- Battery operated for total mobility
- Utilizes multi-mode technologies: Bluetooth + WiFi + 900 Mhz + Cellular/4G/LTE
- Custom printed for your brand
- Always on
- Easy to carry and fast to activate

*Conditions apply. Ask for details.

In September 2018, AHLA announced the 5-Star Promise, a voluntary commitment by AHLA members to enhance policies, trainings, and resources, including employee safety devices, that together are aimed at strengthening safety and security for hotel employees and guests.

Nearly 60 member companies representing an estimated 20,000 hotel properties have made the pledge. As a result, an estimated 1.2 million employees will be better protected on the job. Today, nearly all these hotels have implemented four pillars of the pledge. In addition, more than 5,000 hotels have implemented employee safety devices.
