

David Eakles Joins OneScreen As Director of Education, Another Industry First for OneScreen

San Diego, April 2021

In partnership with VTI, OneScreen welcomes National Distinguished Principal award winner David Eakles into the OneScreen family as Director of Education. This position is the first of its kind for a manufacturer in the collaboration technology industry. Eakles will serve a critical role in both engineering design and communications with educators around the world.

This April, former superintendent of schools David Eakles will join OneScreen as the first and only Director of Education for a manufacturer in the collaboration tech industry. The value that Eakles brings as Director of Education is made possible due to his long-standing relationship with OneScreen distributor VTI.

With more than 31 years of experience in the field of education, Eakles has proven himself to be an extraordinarily effective teacher, principal and superintendent.

Eakles has been inducted into the Kentucky Academic Hall of Fame for his service to schools across the state and, most recently, served as the leading Business Development Manager in Education for OneScreen Reseller SWC, in Louisville, KY.

”

“ONCE I SAW ONESCREEN FLAT PANELS IN ACTION, AND THE EXCITEMENT ON THE FACES OF TEACHERS AND THEIR STUDENTS WHEN THEY GOT THEIR HANDS ON IT, I KNEW THIS WAS SOMETHING REALLY SPECIAL. AT THAT TIME, I THOUGHT IF THERE IS ANYTHING BETTER THAN RUNNING A SCHOOL, OR A DISTRICT FULL OF SCHOOLS, IT WOULD BE BUILDING THE KIND OF DEVICES THAT GENUINELY SPARK A LOVE OF LEARNING. RIGHT HERE, RIGHT NOW, WORKING WITH ONESCREEN, THAT DREAM OF MINE IS COMING TRUE”

~ David Eakles

Director of Education, OneScreen.

”

In his new role, created by OneScreen specifically to take advantage of his outstanding expertise, Eakles will help guide the development of targeted educational technology, as well as consult on smart school initiatives and take the lead in crucial communications with education leaders.

“For many years, we’ve turned to David for his impressive compendium of knowledge on various academic topics, as well as his natural ability to simplify complex issues,” said OneScreen CEO Sufian Munir. “We are honored that he has now come aboard full time, just as the world of education goes through one of the most dramatic turnabouts in history. Accessing new technology in the classroom was a wishlist item for many districts just two years ago. Now it’s an absolute necessity. We’re glad to have David at our side as schools everywhere adapt to the enormity of that change.”

For Eakles, the prospect of working with new people and new challenges on the international stage was too good to pass up. He responded, “Once I saw OneScreen flat panels in action, and the excitement on the faces of teachers and their students when they got their hands on it, I knew this was something really special. At the time, I thought if there is anything better than running a school, or a district full of schools, it would be

building the kind of devices that genuinely spark a love of learning. Right here, right now, working with OneScreen, that dream of mine is coming true.”

More information about how OneScreen is breaking down barriers to learning, including private demos, spec sheets and instructional videos, are available at the OneScreen website and their YouTube channel.

About OneScreen

OneScreen is a complete smart school technology provider with expertise in video collaboration and AI. We’ve discovered through experience that only the finest quality unified communications can bring people together with both the simplicity and the detail they need. For nearly a decade, OneScreen has been a leading force in presenting the world with advances in audio-video, presentation and communications

From the classroom to the conference room, OneScreen is there with customized tools that teams need for smarter, more secure, more productive collaboration - smart screens, software, AI cameras, entryway managers and more. Headquartered in San Diego, California, OneScreen has offices in the United States, Pakistan, Colombia, Mexico, U.A.E. and Canada. All of your collaboration tools are right here.
