

KMxLive - Virtual Classroom, Collaboration and Testing Technology

Unlike virtual meeting room technologies, KMxLive provides the ability to deliver measurable interactive training content to participants. KMxLive can deliver slides, exams, surveys, polls and SCORM conformant eLearning lessons. KMxLive is fully integrated with the KMx LMS/LCMS and supports all blends of learning.

KMxLive Conference Room

The perfect solution for large-scale training and education events with 100 seats per room.

Instructors can push interactive content and exams to participants while tracking their progress and automatically recording the results in the participant's gradebook.

KMxLive Training Room

An affordable solution for measurable collaborative and interactive events with 20 seats per room.

KMxLive Testing Room

Virtual technology designed to meet all requirements for high-stakes testing, certification & licensing programs.

KMxLive Testing Room provides the ability for the proctor to segregate users into individual virtual "cubicles" for conduct of high-stakes exams. Cubicle participant activities are recorded to ensure testing protocols are followed. Leveraging the most comprehensive online exam technologies, even the most rigorous testing center requirements can be easily achieved.

KMxLive with KMxGames

KMx provides game interfaces that can be applied to any KMx Exam or quiz. Emulating popular game shows, KMxGames offers a myriad of features to enable completion of exams in a fun environment. Complimented with audio and video segments, leaderboards and comprehensive reporting, the game interfaces provide a compelling and exciting mechanism to enhance your KMxLive training events.

Interactive Recorded Sessions

Unlike competitive offerings, interactive elements (exams, games, eLearning and microlearning lessons) that are pushed to attendees during a KMxLive event are included in the system generated replay. On-demand users receive the full experience of the live attendees, including the ability to interact with elements delivered during the live event as if they were actually there. This also includes individual system generated performance feedback, inclusion on leaderboards, remediation and moderated forum technology.

Extensive and Easy to Use Features

Fully integrated authentication

Poll your users

Conduct exams with proctoring

Share and annotate your screen

Send public and private messages

Use breakout rooms

Communicate using audio

Share the whiteboard

Instruct/learn from mobile devices

Enable webcams to hold visual meetings

Express yourself with emojis

Deliver eLearning, references and micro-learning

KMxLive Pricing:	Annual Fee
KMxLive Virtual Conference Room (100 participant seats per room)	\$1,000
KMxLive Training Room (20 participant seats per room)	\$500
KMxLive Testing Room (20 individual testing cubicles per room)	\$1,000

"With KMxLive, training materials in many formats (including recorded live sessions, PowerPoint presentations and videos) can be placed online quickly. Using this new open platform, workshop sessions can be recorded online and played back for later access ."
