Description

The T213 is a Single-Mode Fiber (SM) based advanced Fiber Bragg Grating (FBG) Packaged Surface Strain Sensor for use in environments from -270°C (\sim 5K) to +40°C.

ATEX compliant for use in explosive environments and packaged to operate at ultra-cold temperatures. Ready for direct mounting and exhibiting excellent wavelength to strain linearity. Temperature compensated. The full-scale (FS) accuracy and precision specifications take into account any hysteresis, non-linearities, and the repeatability of the sensor. The T213 sensor handling and installation is fast, easy and intuitive. Delivers the advantages inherent to FBG based sensors including immunity to lightning and electromagnetic interference (EMI). Spot-weldable version for -270°C (~5K) to +120°C can be made available upon request.

T213 series Surface Strain Sensors are fabricated using licensed and proprietary state-of-the-art laser manufacturing technologies and product designs. The sensor packaging described herein represents the most popular configuration and can be customized.

Key Features

Precise and repeatable strain measurements at cryogenic temperatures. The advanced unibody T213 micro-structured design for temperature compensated strain measurements in ultratemperature low environments uses two precision made FBGs written into the fibers' core and advanced materials technology for producing a transducer configuration of high resolution, precision, and repeatability. Standard and custom Reflectivity, SLSR & BW options are available.

various lengths and with a flexible number of T213 strain sensors.

Field proven with hundreds of completed installations. For demanding projects that require stable operation for the long-term.

Manufactured and sold by Technica under International Licenses from Raytheon and Kawasaki Heavy Industries

Parameter	Specifications
Wavelengths and Tolerance	1510 to 1590 nm, +/-0.5 nm; 980, 1060, 1310 nm, other
Reflection BW (FWHM)	0.25 nm to 2.0 nm
Reflectivity %	75% (1% to 99% available)
SLSR	15 dB; other options
Gage Length and Range	10 mm and +1500/- 5000 με
Strain Accuracy	<0.5% FS (<0.25% FS typical)
Strain Precision	<0.25% FS (<0.15% FS typical)
Temperature Compensation	Integrated within the sensor
Sensor Pigtail (Length, DIA)	1 m and 1mm, other options
Cable Bend Radius	20 mm Static, 30mm Dynamic
Optical Connector	FC/APC, LC/APC, other options
Housing Material	Stainless Steel SUS304
Dimensions LxWxH	42x32x2.8 mm before and 39.9x16x2.5 mm after installation
Weight	7.5 grams before and 3 grams after installation
Mounting Methods	Epoxy for Low Temperature

Applications in LNG Marine, Aerospace, Industrial, Medical, and Research Laboratories

Technica undertakes a rigorous development process before products release. The company is also firmly committed to continuous improvements after release to insure performance to the highest standards, hence, specifications are subject to update without notice.
