Best in Class Education Offers Accelerated Catch-up Programs this Summer to Seattle Students

Seattle, WA: COVID-19 has left lasting disruptive effects on students' educational gains, and Best in Class Education powered by Adaptively is ready to respond with the launch of COVID Catch-Up Accelerator Programs in Seattle, WA. Best in Class Education will use the summer months to offer Seattle students accelerated Math and English programs with the goal of getting students back on track for the 2021-2022 school year.

Hao Lam, Best in Class's owner and founder, says he is ready to close the education gaps with the launch of online accelerator programs. "We are committed to being responsive to the needs of the students we serve in Seattle during these unprecedented times in our children's education."

Best in Class's COVID Catch-up Accelerator Programs

A leader for 26 years in supplemental education, Best in Class is equipped with its Common Core aligned proprietary curriculum offered through the ease of a Canvas-backed learning management system (LMS). The accelerator programs that are designed with three levels of support to match individual student's learning needs, whether they are a little behind, or need

more accelerated learning this summer. Students will access online assessments which will deliver instant results for identifying learning gaps in math and English/ELA and place them in small, live, interactive, and learning-intensive groups. In addition to the customizable curriculum, cutting-edge technology will reward and motivate students towards goals by integrating game-based learning.

“We recognize this summer is a valuable time for helping students. We have a proven, standards-aligned curriculum that will allow us to not only remediate learning for students but to also accelerate their progress,” said Best in Class’s Vice President of Operations, Laura Leddusire. Always ready for the unexpected, Best in Class Education is prepared to make summer learning highly effective, engaging, and fun.
