

Agilitech – Powering Food & Beverage Production.

Agilitech Food & Beverage provides process design and engineering for the complex handling and processing of a wide variety of products, from raw to finished goods. Our high quality, fit-for-purpose solutions prioritize hygiene, safety, and efficiency.

Our Services – game-changing solutions to optimize production & processes.

Control System Automation & Software Development:

Comprehensive and flexible, end-to-end solutions for the calibration, maintenance, and troubleshooting of electronic, mechanical, and computer-based process instrumentation and controls.

Electrical Construction: Full-service electrical construction, maintenance, instrumentation, and communication services for industrial clients, with a focus on safety and quality.

Engineering & Design: High level and integrated customer support throughout your asset life cycle for greenfield, brownfield, capital projects, operations, construction, maintenance, project management, stakeholder management, startup, turnarounds, procurement, and other project engineering needs.

Facility Engineering, Design, and Construction:

Comprehensive master planning, FEED studies, electrical construction, turnkey/EPC/Design Build services, utility engineering and design for infrastructure improvements.

Laser Scanning: Geomatics services, including 3D laser scanning, 3D planning and virtual surveying, construction surveying, geographic information systems (“GIS”), as well as mapping and remote sensing.

Panel Fabrication: UL 508A and UL 698A Certified Panel Fabricator, with high quality workmanship and a finished product that exceeds industry standards. We offer custom-built panels or pre-engineered, customizable VFD solutions.

Preventative Maintenance: Equipment inspection, visual checks and testing, electrical panel and MCC gear cleaning, electrical connection testing, grounding assurances, and code compliance inspections.

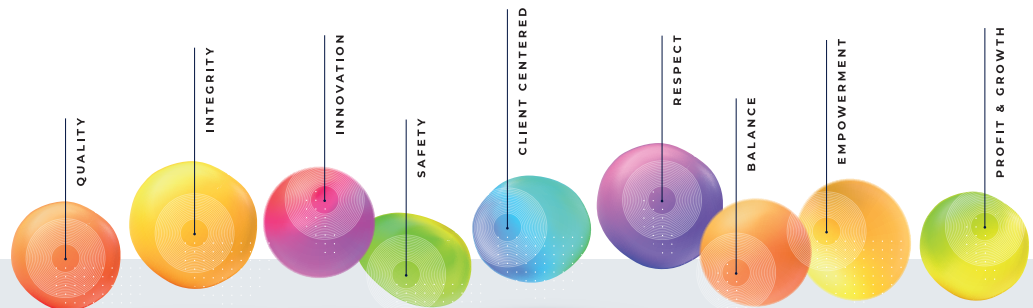

Process Engineering & Design: A full range of services, from FEED and conceptual designs, to detailed design, startup, and commissioning services, working closely with clients to identify and implement cost-effective solutions.

Project Management & Controls: A full-service project management solution, providing planning, scoping, budgeting, project execution, cost controls, bidding, construction management, and startup and commissioning services.

Regulatory & Compliance Services: Facility compliance studies and regulatory analysis, safety services, training and audit support, arc flash training, and hazard analyses to support clients in navigating complex safety regulations and compliance requirements.

Safety Services: Customized, flexible, and state-of-the-art safety services to protect our clients, eliminate injuries, mitigate risk, reduce insurance costs, and ensure compliance with federal and state worker-safety rules.

Our Values

The Agilitech Difference

We are known for quality, integrity, and our commitment to delivering the best for our clients. Everything we do is about empowering you to achieve your goals through value-added services, products, and collaboration. Our solutions are tailored to your needs, integrated, and agile so that they grow and adapt with you. Our commitment to the long-term best interests of our clients will always be what sets us apart.

We look forward to partnering with you.
