# Microsoft 365 Health Check Produces Savings and Security

Free Health Check Tracks License Use, Workload Analysis

Many Microsoft 365 businesses are in need of uncovering unused and unassigned licenses, key productivity applications that could be optimized and vulnerabilities that are undiscovered

⚠️ **License Management**

🛡️ **Secure Environment**

📋 **Boost Application Adoption**

Analyze Your Total Microsoft 365 Environment

● **Report Sign-Up Is Effortless**

Only takes 5 minutes to get started scanning and analyzing your entire Microsoft 365 environment. We track usage data for workloads, security profile, license status, and mailbox safety and other security issues.

● **Report Finds All Microsoft 365 Apps**

20-page Health Check report shows license underutilized, insecure end users, and areas for administrative improvement.

Boost Teams Adoption and Learning

● **Learn Teams Quickly with (JITL)**

Send users messages tailored to shift activity to Teams. Increase productive use via 2500+ JIT learning videos embedded into app workflows.

● **Monitor Adoption Campaigns**

Analyze workload activity and user configuration to identify users who need training or assistance with Microsoft 365 workloads.

Manage and Optimize Licenses

● **Find Unused and Unassigned Licenses**

Unsecured licenses can be reassigned or reallocated to employees in need.

● **License Optimization Drives ROI**

Turn dormant licenses into active users. Drive total service usage -- and double end user productivity.

Tighten Security, Gain Compliance

● **Find and Fix Vulnerabilities**

Discover who is spreading malware, sharing files dangerously, or have insecure passwords and stop it.

● **Tighten Administrator Roles For Safety**

Adopt least privilege security by knowing who has full admin rights that shouldn't.
