TEKLYNX 2021

Barcode Label Software Solutions

BUILT FOR BETTER CONNECTIONS

Now more than ever, businesses need connectivity to thrive. Whether that be connecting with others in your organization, connecting data from cloud systems to your labels, or connecting your organization with the global supply chain, TEKLYNX is here to help you make those connections strong. TEKLYNX 2021 label solutions are built with connections in mind because when you can connect better, you can barcode better.

LABEL DESIGN SOFTWARE

LABEL MATRIX 2021

For simple labeling requirements. LABEL MATRIX is a feature-rich barcode label design application for low complexity labeling environments. Helpful wizards guide you through adding text, images, and barcodes, database connections, and advanced design options to ensure a straightforward process.

Along with updated printer drivers, LABEL MATRIX 2021 introduces label design smart guides to easily align artwork and elements on your label.

LABELVIEW & CODESOFT 2021

New features in LABELVIEW & CODESOFT are built for you to connect better. The introduction of OneDrive & Google Drive connections make it easy for you and the people in your organization to access your label data.

Connections from online sources and your company's central databases enable a smoother data transfer to make your process faster and more efficient.

ONEDRIVE & GOOGLE DRIVE CONNECTIONS

Pull data directly from OneDrive or Google Drive for easier connection between your data and label elements

CLOUD STORAGE

Store labels on OneDrive & Google Drive for central label storage through the web

TOUCH2PRINT

Interface designed specifically to make printing from your Windows tablet easier

VARIABLE COUNTER FUNCTIONS

Connect the counter function to an external data source for advanced serialization

ONLINE DATA SOURCE INTEGRATION

Access data on-demand from a website or cloud based ERP systems for easier connectivity

FORM EDITOR IMPROVEMENTS

Create a better user experience and workflow that reduces the number of labeling errors

IMAGES FROM A DATABASE FIELD

Store your images in your database for a more streamlined connection

PRINT FORM IMPROVEMENTS

Added elements on the print form for more dynamic print previews

LABEL ARCHIVE

Many industries are regulated to enforce labeling workflows and ensure that the same process is followed every time a label is generated. LABEL ARCHIVE gives you full traceability of label design, storage, and printing to support compliance with industry regulations and internal process requirements.

ENHANCED WEB API

Integration with RESTful API, the standard of web protocols, that is easier to use, more reliable, and offers greater flexibility.

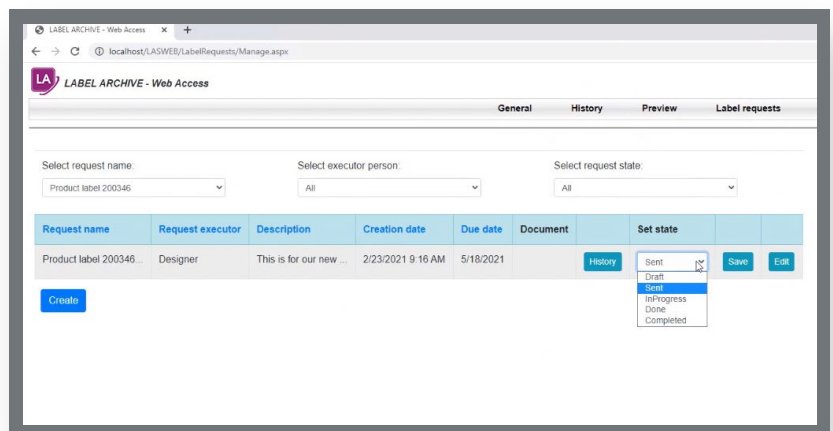

AUTOMATIC BACK-UP SERVER

If your primary server shuts down, your secondary server automatically becomes the primary server. Once your primary server is up and running, the secondary server switches to back-up.

MODBUS SUPPORT

Support for Modbus Protocol messaging structure to communicate with your Programmable Logic Controller.

LABEL ARCHIVE WEB RELAUNCH

- ✓ New, sleek interface for easier navigation and accessibility
- ✓ Track a label throughout the entire process
- ✓ Ability to request a template design
