ECO SMART™

Earth friendly plastic that returns to nature™

Eco Smart™ containers by Federal Package are the ideal solution to meet your sustainability goals.

This proprietary **eco:one** technology enables plastic components to break down in biologically active environments. The Eco Smart brand by Federal Package is a direct upgrade to our existing line of world class products with no change in form, fit, or function.

Eco Smart containers have been independently tested to ASTM D5511 (municipal landfill) and ASTM 6691 (marine) protocols and have shown excellent biodegradation rates.

Important California Notice: California law prohibits the sale of plastic packaging and plastic products that are labeled with the terms 'biodegradable,' 'degradable,' or 'decomposable,' or any form of those terms, or that imply in any way that the item will break down, biodegrade or decompose in a landfill or other environment. These restrictions apply to all sales in or into the State of California, including such sales over the Internet.

ABOUT FEDERAL PACKAGE

With over 40 years of experience and innovation, Federal Package partners with you to provide the perfect manufacturing solution for your personal care business, all under one roof.

From formula development, compounding, filling, decorating and retail-ready packaging, let us put our technology, creativity and market leadership to work for you.

We are ready to assist you on your journey to a more sustainable world.
