

# Vaultedge Mortgage Automation

Index & extract data from hundreds of mortgage documents in minutes.

## What is Vaultedge Mortgage Automation (VMA) ?

Vaultedge Mortgage Automation (VMA) is the most advanced intelligent automation software that uses artificial intelligence to automatically review loan documents, file them into correct folders and cross check the data with your LOS.

With Vaultedge Mortgage Automation (VMA) you can close & board loans 5 times faster with less work. **To get a free demo, go [here](#).**

## | Our Solutions

### Loan Processing Automation

Manually reviewing 500+ pages loan files and entering data is tedious and error prone. VMA software automatically splits these files, indexes documents by type and extracts relevant content. It helps you:

- Ensures that your loan package is complete and compliant with TILA-RESPA, HMDA etc.
- Extract 1000s of data points from loan package in minutes.
- Move documents & data into LOS like Encompass, Black Knight Empower etc on a button click.

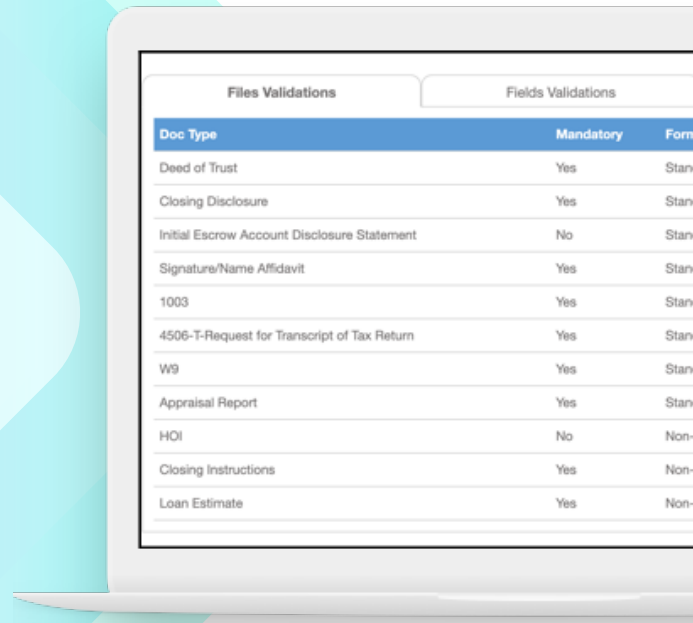

### Loan Servicing Automation

When servicing rights are transferred, banks have just a few days to onboard 1000s of mortgages. They have to deal with inconsistent document names, inaccurate indexing and extensive list of fields that needs to be verified.

With Machine Learning, Vaultedge automatically indexes documents, extracts data and compares it with source data. With VMA software, you can ingest more than 10,000 loans in a single day.

**"We used Vaultedge to automate indexing of more than million documents every month. This enabled us to move 70% of people from Document Recognition to other processes."**

- Head of Servicing (Top Mortgage Servicer)

Doc Type	Mandatory	Form
Deed of Trust	Yes	Stan
Closing Disclosure	Yes	Stan
Initial Escrow Account Disclosure Statement	No	Stan
Signature/Name Affidavit	Yes	Stan
1003	Yes	Stan
4506-T-Request for Transcript of Tax Return	Yes	Stan
W9	Yes	Stan
Appraisal Report	Yes	Stan
HOI	No	Non
Closing Instructions	Yes	Non
Loan Estimate	Yes	Non

## **AUTOMATED DOCUMENT INDEXING**

VMA uses artificial intelligence to automatically identify and split a loan package into individual documents and index the documents by type: 1003, Loan Estimate, Closing Disclosure, Deed of Trust etc.

## **EXCEPTION HANDLING**

Users interact with Vaultedge's easy-to-use UI, to verify indexed documents and rearrange mis-placed pages at the click of a button.

## **DATA EXTRACTION & VALIDATION**

VMA extracts all relevant data from each of the documents in the loan package. Across documents, VMA extracts more than 2000 data points and compares the extracted data across different documents to identify discrepancies.

**Vaultedge Mortgage Automation cuts down document processing time and cost by 80% while delivering up to 99% accuracy.**

We deliver better results because ..

1

We use advanced machine learning models that help us deliver better accuracy than OCR technology

2

Simple plug & play software that can be deployed within days.

3

Comes pre-configured with 500+ distinct document types and checklists compliant to TILA-RESPA, HMDA
