Hystax OptScale

FinOps & cloud cost management platform for Kubernetes and traditional workloads

Full cloud cost transparency and optimization

Cloud cost management for AWS, MS Azure, Alibaba and Kubernetes workloads

Engineering team engagement in FinOps and cost saving

Hystax OptScale is a powerful solution that enables companies to build a culture of responsible IT workloads usage by providing all the necessary instruments in one product and educating teams:

➜ support of AWS, MS Azure, Alibaba and all the Kubernetes clusters;

➜ free cost optimization, resource TTLs and cost limits, cost anomaly detection;

➜ slack integration to get alerts and manage product parameters;

➜ integrated cost management and FinOps education center;

➜ cost metrics for unit economics of Kubernetes and public cloud applications;

➜ in-depth cost analysis - resource pools expense history and fully detailed resources;

➜ tag policies and resource auto-assignment.

Get the first optimization results in 20 minutes without any long configuration process and deployments. OptScale is available as a SaaS and a private deployment.
