Teach

All of the tools found in a traditional K-12 LMS, and more.

Instruct

Assign, organize, and share lessons with ease.

Communicate

Share announcements to classes or directly to families.

Celebrate

Showcase student work, behavior, and accomplishments.

Otus has helped us streamline and synchronize our instruction, communication, and resources by **eliminating subscriptions** that we no longer need.

Grade

Engaging formative and summative assessments aligned to standards.
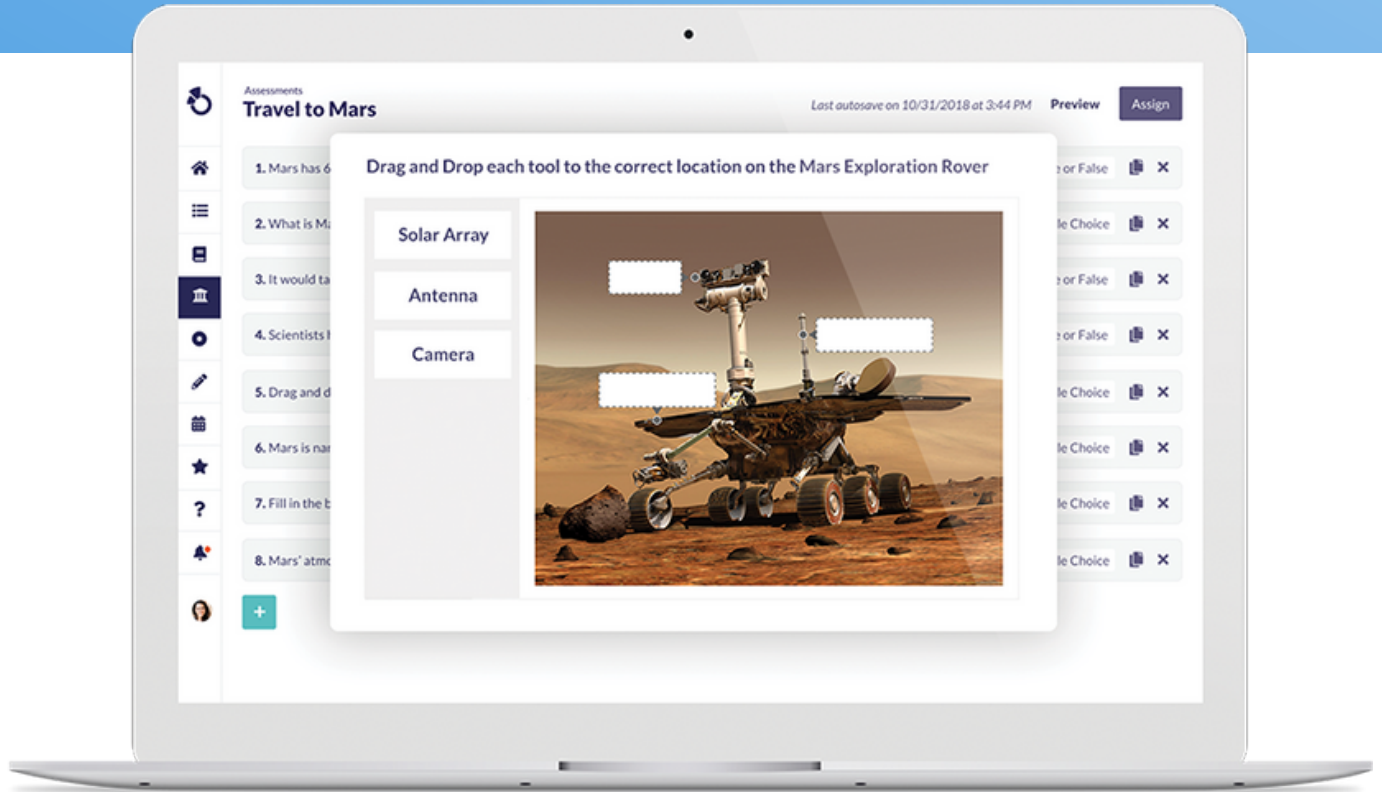

Create
Personalize assessments with 65+ question types aligned to standards.

Assess
Score rubrics side-by-side with Google Docs, videos, or audio, and more.

Respond
Recognize great work and provide feedback to students.

Now that we have a platform that is easy to understand, it's the first time teachers can track data or trends specific to how students are doing on assessments in real-time."

Analyze

Bring together third-party data with data generated in classrooms, as it happens.
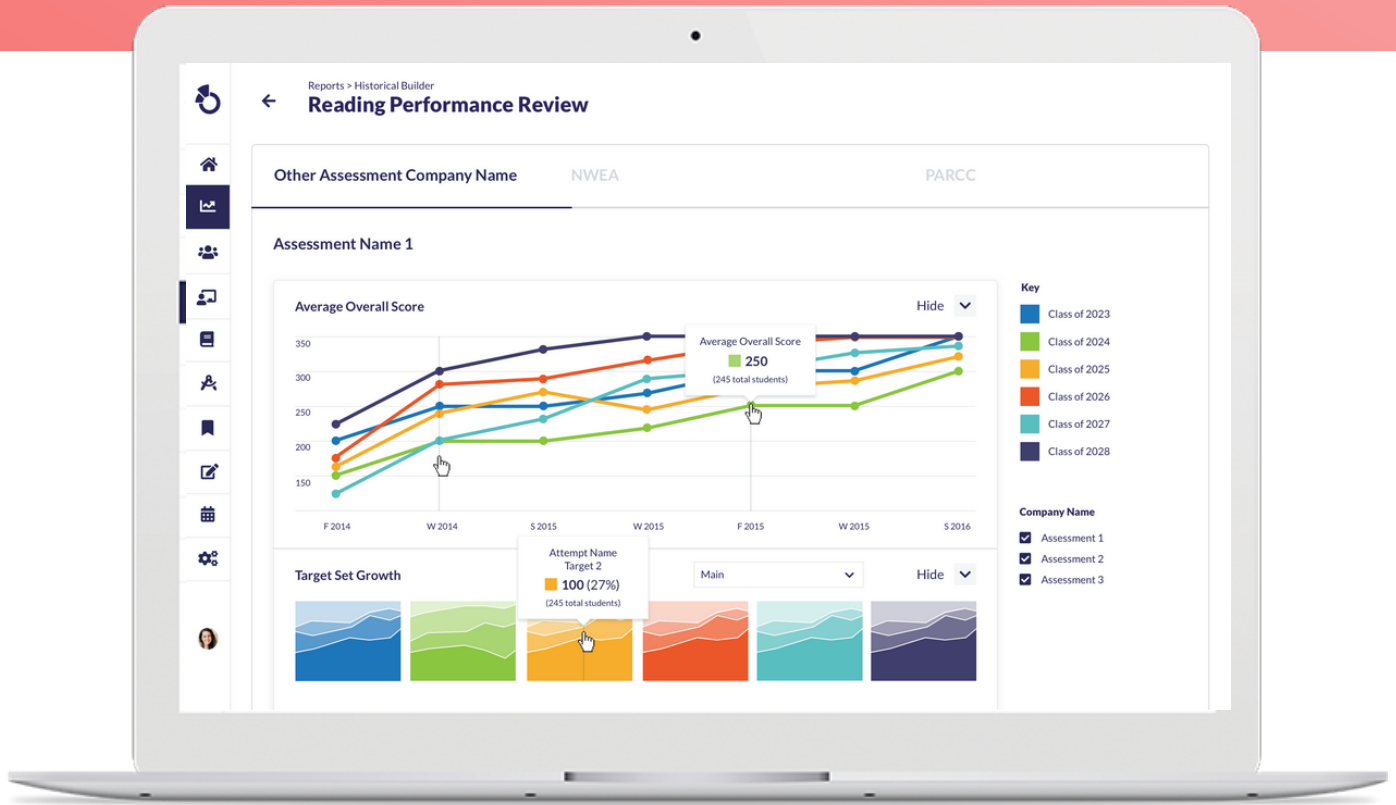

Connect
Import all third-party data, including benchmark assessments.

Build
Group students based on assessment, attendance, behavior, and more data.

Display
Provide simple, clean reports on your school community.

With Otus, teachers are able to be more focused on learning targets, students are better at understanding their levels of growth, and parents are asking more intentional questions about their children's learning.
