150+

airports we worked
with across the world

100+

unique solutions
developed

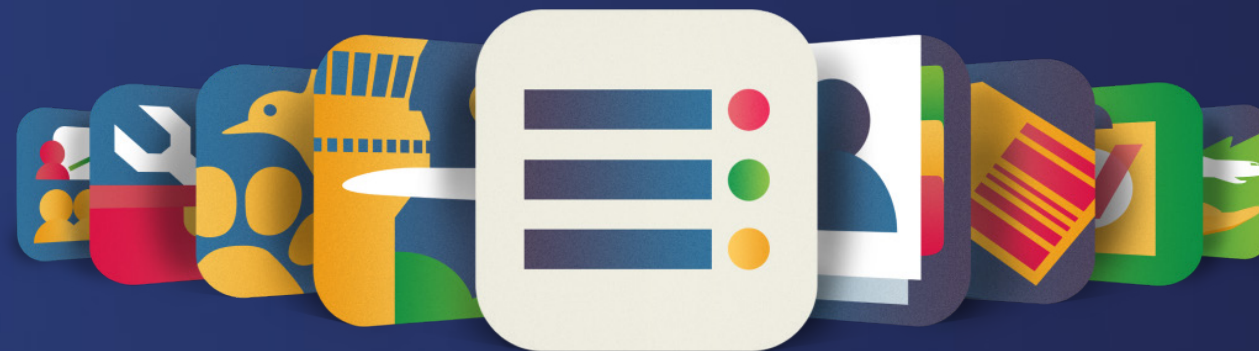

30+

strong team for
customer support

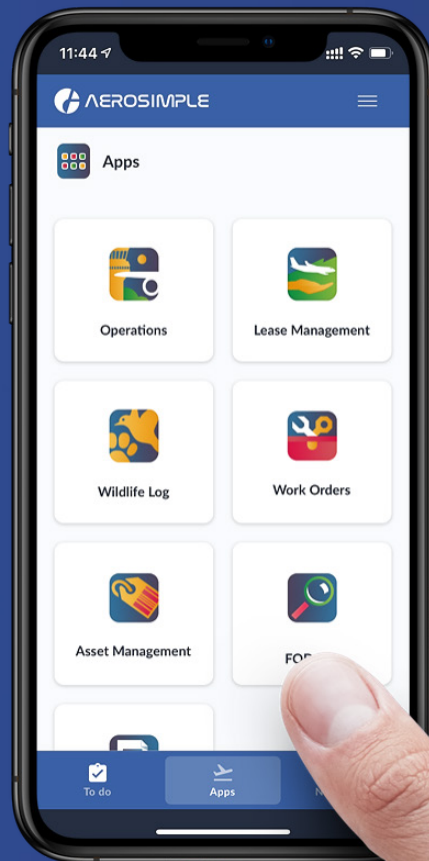

You're in a battle against legacy workflows

Airport operations managers are spread thin. They spend more time reacting to issues than performing the proactive and valuable work they were hired to do. Some of the common efficiency blockers include:

- ✗ Multiple people unknowingly working on the same issues.
- ✗ Slower review processes as documents get buried in email threads or paper bins.
- ✗ Creating time consuming manual reports for management.
- ✗ Limited insights into recurring issues with airfield assets.
- ✗ Scrambling to prepare for annual FAA inspections.

Our cutting-edge technology empowers you to stay in sync and control at all times!

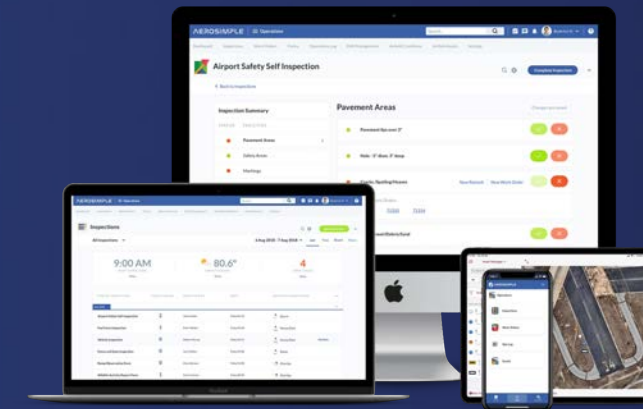

100% of people who tried our system have agreed that Aerosimple is simple to use and has the industry's most affordable and best mobile offering.

One software to manage all your airport operations

Aerosimple is a secure, intuitive, easy to implement airport operations software that allows you to streamline and simplify your daily airport tasks, ultimately saving you time and money.

Aerosimple can be easily accessed on multiple devices – **Desktop, Tablet, and Mobile.**

Desktop in your office

Use the web version of our software to keep you on top of everything right from your office.

Tablet on the airfield

Our state of the art tablet app designed specifically for iPads provides a superior experience in the truck while conducting inspections.

Mobile on the go

Want to access information on the go? No problem, download the mobile app (iOS and Android) to stay connected at all times.

Integrated solutions at your fingertips

Airfield Inspections

Digitize your daily inspection forms in a few clicks to remove the hassle of paperwork.

Wildlife Management

Track wildlife incidents, species, location information on the airfield and instantly integrate the report into the FAA bird strike database.

Airport Portals

Finally, a solution that seamlessly connects your airport's brand & messaging with your employees and tenants for enhanced communications.

Lease Management

Centralised database of hangers, leases, contacts, contracts and inspection information.

Inventory Management

A state of art integrated system that automatically tracks inventory and triggers alerts when the inventory falls below a defined threshold.

Work Order Management

Identify, assign and resolve work orders, so everyone stays on the same page.

FBO Management

Tracking and managing various FBO activities including fuel and service requests is now at your fingertips.

Safety Management System (SMS)

A proactive solution to identify, track and mitigate potential hazards making the facility safe and secure.

Data Forms

Create customized reporting forms for your day-to-day activities easily accessible from any location and device.

Airfield Condition Reporting

Share airfield condition reports, NOTAMs and critical airport updates with stakeholders on your website.

Asset Management

Asset registry made easy with detailed insights into recurring maintenance issues and associated costs.

Personnel Training Management

Maintain your staff's training logs on a calendar and receive alerts about their upcoming trainings.

Incident Reporting

Aircraft accident reports can now be completed effortlessly without missing out on critical information.

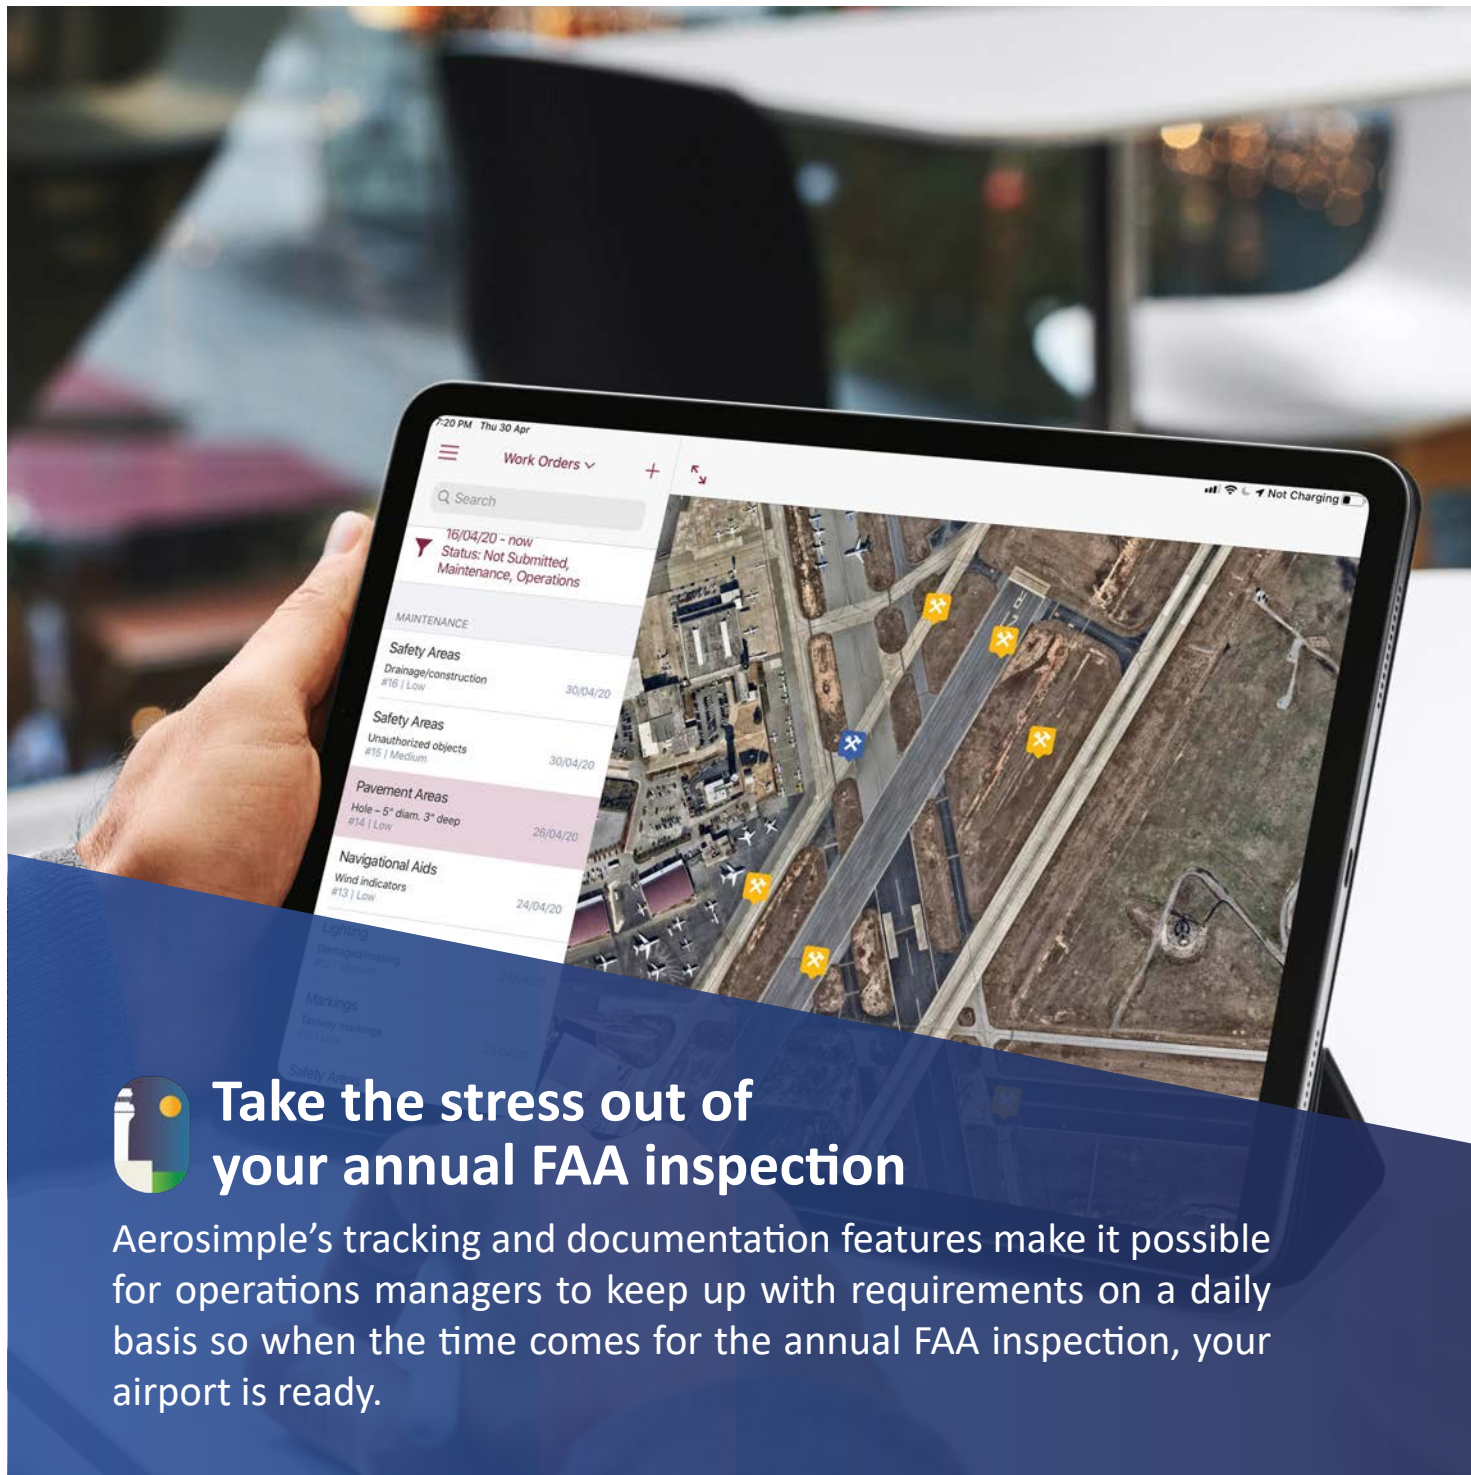

FOD Log

Report and track unwanted foreign material and debris to improve the safety of your airfield.

Operations Logs

Automatically add log entries from inspections, work orders and IOT devices.

Take the stress out of your annual FAA inspection

Aerosimple's tracking and documentation features make it possible for operations managers to keep up with requirements on a daily basis so when the time comes for the annual FAA inspection, your airport is ready.

Aerosimple provides the following benefits

Pass FAA annual inspections simply and with less confusion

Aerosimple tracks airfield issues and automatically generates documentation in the format required by the FAA.

Complete tasks once, not twice

Serves as the central location for airfield asset inspections, eliminating duplicate efforts across teams.

Real-time reporting

Get reports on airfield status, open work orders, and costs.

Identify recurring issues

Know which assets are ageing so your airport can decide whether to replace or repair and avoid wasting money.

100% Mobile

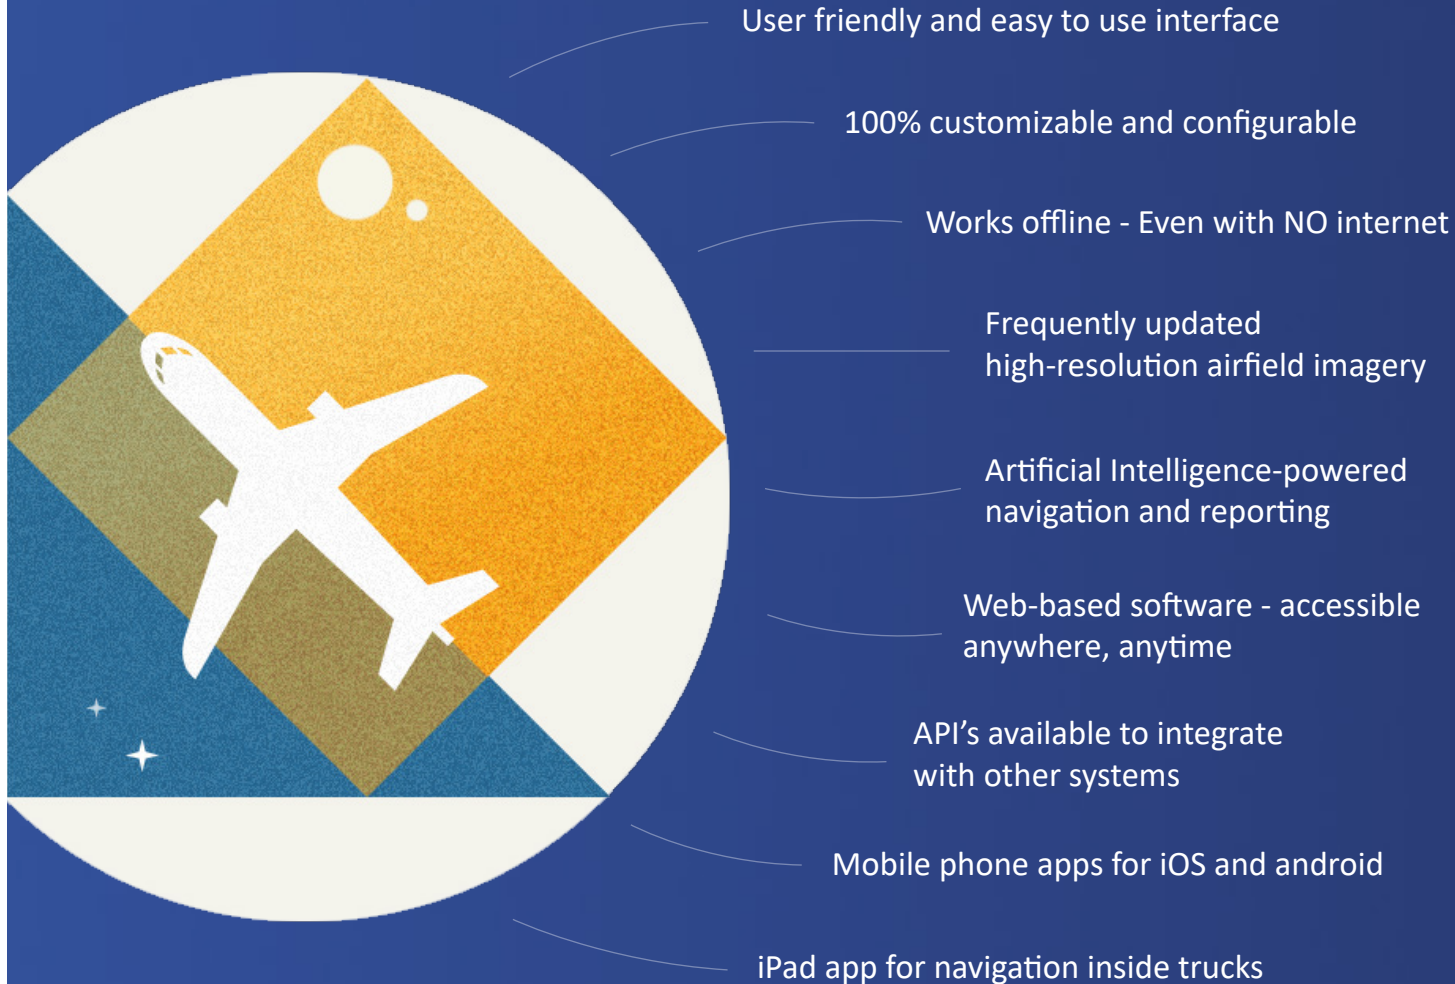

Take your tablet or iPhone to the airfield, and note discrepancies directly onto your airport's digital map.

Only have the conversations you need to

Airport operations and management stay on the same page with Aerosimple as the single source of truth.

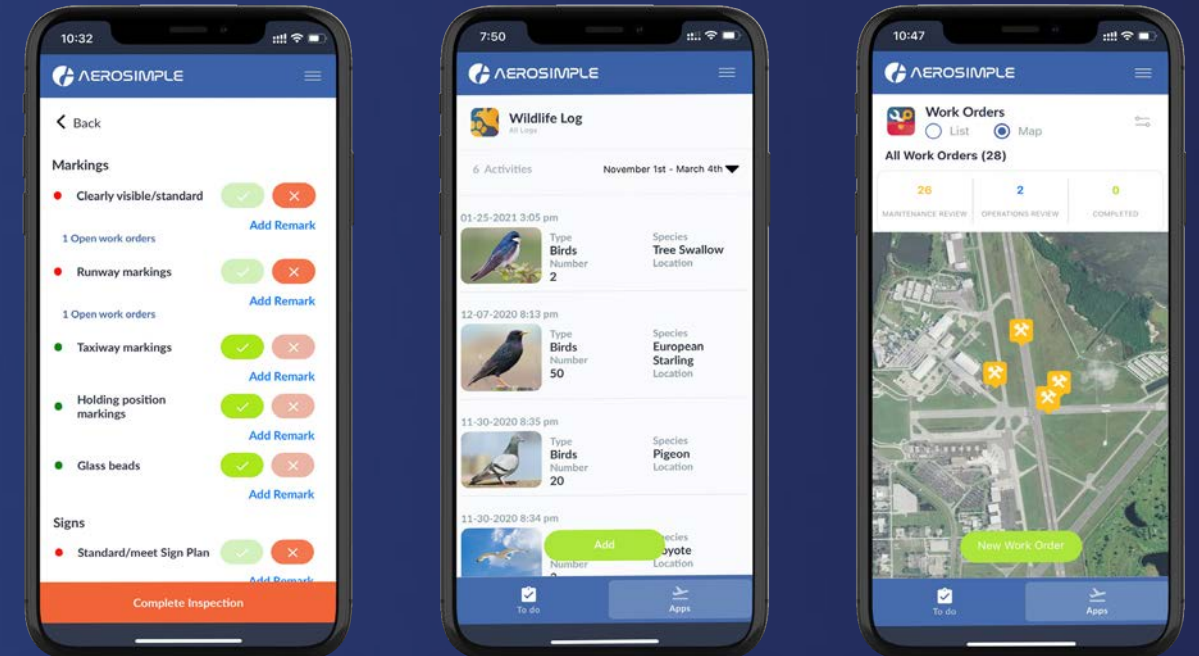

Why choose Aerosimple?

Aviation is our only priority. Robust software platform has been designed by aviation professionals for aviation professionals to make airport operations and management Simple!

The Aerosimple difference is ... simple.

- ✓ NO setup fees
- ✓ Unlimited users
- ✓ Unlimited modules
- ✓ Unlimited forms and data storage
- ✓ FREE lifetime software upgrades
- ✓ NO additional cost for training
- ✓ 24x7 customer support

“

We love how flexible the system is and how much we can do ourselves. The previous system we used, we had to contact the developer in order to make any simple changes (add inspection criteria, etc.). It has been a pleasure working with Aerosimple through the initial implementation stages of the software, we are looking forward to the partnership and continued growth of the system!

Cody Bauman, A.A.E
Director of Operations
Greenville-Spartanburg International Airport

“

Aerosimple is an intuitive, graphically pleasing, all-inclusive solution for a complete airport operation. Every facet of our operational tracking is now done from one piece of software. Give Aerosimple a try, you will not be disappointed!

Cody Mathis, C.M
Airport Operations Manager
Waco Regional Airport

“

Aerosimple provided us an opportunity to better identify, track, and account for our primary needs in facility inspection and work order management, as well as provided a cost effective opportunity to explore digital management in other areas including properties and lease management, asset management, and Wildlife tracking.

Travis Crilly, A.A.E
Operations Manager
Blue Grass Airport
