ActionCue®
CLINICAL INTELLIGENCE

Fast Path to Insight™

One Goal, One Platform

The ActionCue CI application ensures staff are working together towards one goal: optimizing patient care. This collaborative platform connects all levels of the healthcare organization to remove redundant, inefficient processes and deliver real-time operational insight.

Drive Real-time Quality & Performance Improvement — Risk management and quality in one work platform that actively flows into an optimized performance improvement process.

Improve Efficiency — No messy, hand-written forms to decipher, complicated spreadsheets to manage, or reports to prepare and distribute. It's all automated and easily accessible in the platform for staff and management to see and use.

Transform Culture — From front-line staff to hospital executives, all members of the healthcare organization can contribute to performance/quality improvement, increasing efficiency, reducing cost and improving quality of care.

Get Results — Improved quality-safety and increased efficiency, as a sustainable culture, mean better patient outcomes and time and money savings.
