

SOLE™

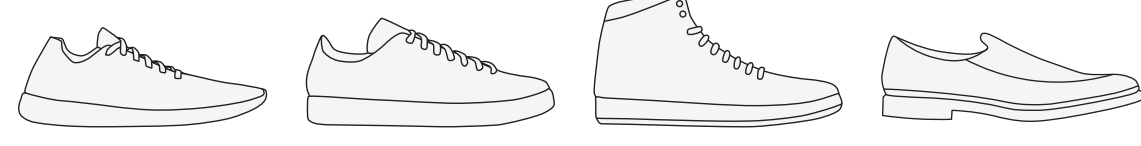

- 2.28
kg CO₂e
CO₂- Certified carbon negative.

INTRODUCING
THE FIRST EVER
**CARBON
NEGATIVE
INSOLE.**

Superior support.

These footbeds offer shock absorbing comfort for every day, as well as protecting feet during high-performance pursuits. **Custom-molding comfort** for casual and active footwear.

Carbon negative.

During its life cycle, this product removes more carbon from the atmosphere than it adds, thanks to the incredible carbon-trapping properties of natural cork. **Read more** about our carbon impact calculations.

How cork creates a carbon-negative impact:

-4.15 kg CO₂e
Carbon sequestered
By cork oak trees before material processing.

+

1.87 kg CO₂e
3rd party LCA
Carbon emitted during cradle-to-grave processes.

=

- 2.28
kg CO₂e
CO₂- Certified carbon negative.

Benefits.

- Reduces plantar fascia strain.
 - Suitable for any arch height.
 - Provides cushioned support.
 - Promotes natural foot alignment.
 - Heat and wear moldable for customized fit.

PAPER
NOT PLASTIC

The planet has a plastic problem.

Product packaging contributes to the hundreds of millions of tons of plastic waste produced every year. We're determined to be part of the solution. Our footbeds are packaged in recycled and recyclable paper, no plastic necessary.

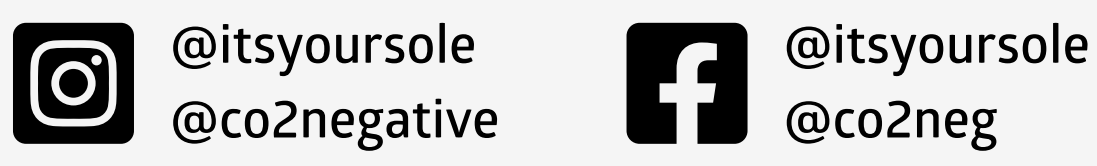

More about cork.

Cork is sustainably harvested by hand every 9-12 years **without ever killing the tree.** Each tree can be harvested **15-18 times.** When a cork tree is harvested it starts absorbing up to **five times more CO₂** as it photosynthesizes to grow back the bark that's been removed. [Learn more](#) about the incredible power of cork.

Help spread the word about our carbon-negative mission.

The more people know, the bigger positive impact we can have.
