NEWS RELEASE

Health & Biosciences
Danisco Animal Nutrition

IFF's Health & Biosciences Names Pael Fokin as Vice President of Animal Nutrition

NEW YORK – Sep. 27, 2021 - IFF's Health & Biosciences division, a world leader in sustainable biotechnology solutions, announced today that they have appointed Pael Fokin as vice president of Danisco Animal Nutrition business.

Fokin brings over 25 years of international business management experience to his new role with a solid background in the specialty chemicals, food ingredients and pharmaceutical industries. Most recently, he was the global commercial vice president for the Pharma Solutions division at IFF.

Pael Fokin stated, "I am thrilled to have the opportunity to work with such a uniquely talented and vibrant team within Animal Nutrition. I am excited about the opportunities to enhance our leadership position in phytase and other feed enzymes, as well as expand our portfolio of solutions in nutritional health. I look forward to meeting our customers to understand their strategic challenges and how we can leverage the powerful science within IFF's portfolio to create leading solutions for the animal feed industry."

Simon Herriott, president of Health & Biosciences division, IFF stated, "Pael is a great addition to our leadership team. He has a proven track record for delivering growth, managing customer relationships, building high performance teams and driving high value strategic projects to completion."

Pael Fokin holds a Master of Business Administration from the London Business School and a Bachelor of Science in Chemical Engineering from the Penn State University. He will be based at the IFF's Health & Biosciences divisional headquarters in Wilmington, USA.

About Danisco Animal Nutrition

Danisco Animal Nutrition, now part of IFF is a market leader in nutritional health solutions with a comprehensive portfolio of feed enzymes, betaine, phytochemicals and probiotics. Through the lens of nutrigenetics, IFF invests in science and innovation to help producers improve performance, increase liveability and support welfare in the face of increasing pressure to reduce or remove antibiotics from production systems. Danisco Animal Nutrition capabilities are underpinned by the quality and quantity of our trials, including over 80,000 guts sampled from over 500 farms, investments in omics technologies and microbiome research, and collaboration with leading commercial, governmental and academic partners.
