

# REDUCING TCO WITH LCFS REVENUE

**With SRECTrade's help, fleets are funding budgets to deploy and operate clean equipment.**

## WHAT ARE CLEAN FUEL PROGRAMS?

Clean fuel programs aim to accelerate the transition to cleaner fuels and displacing gasoline and diesel usage. Regulators like the California Air Resources Board (CARB) issue credits to clean transportation asset and equipment owners on an ongoing basis for usage of clean transportation fuels and equipment. These credits can then be sold to gasoline and diesel producers who need to purchase these credits for compliance with the program. These programs are already active in California (LCFS) and Oregon (CFP), and are expanding across across North America.

## ESTIMATED PROCEEDS - CALIFORNIA LCFS

**Agricultural Processing Site:** 150+ electric forklifts and five (5) electric yard trucks with moderate use  
Quarterly proceeds of >\$200,000; **annualized proceeds of >\$800,000**

**Small Warehousing Facility:** 50+ electric forklifts and two (2) electric yard trucks with light usage  
Quarterly proceeds of >\$19,000; **annualized proceeds of >\$75,000**

**Grocery Distribution Facilities (two sites):** 80+ electric forklifts and pallet jacks and two (2) electric yard trucks with heavy usage

Quarterly proceeds of >\$50,000; **annualized proceeds of >\$200,000**

## ABOUT SRECTRADE

SRECTrade is the largest agent manager of EV assets for **California's Low Carbon Fuel Standard (LCFS)** and the trusted partner across North America for similar programs such as the **Oregon Clean Fuels Program (CFP)**. SRECTrade makes it simple to maximize the value and get paid by generating LCFS credits. Customers work with SRECTrade because:

- Renewable energy sourcing - Make more \$\$\$ for your credits
- No invoicing, no out of pocket costs, and a transparent fee structure
- Web-based software platform
- >99% client retention, 54,000+ clean energy assets under management, 175,000+ total assets
