

Connected Solutions for Professional Grounds Management

We help fleets select and deploy technologies that enhance productivity, reduce risk exposure and lower CPM

Safety

Improve driver scoring, training and monitoring

- EnVue DriverScore® monitors aggressive driver behaviors
- DriverScore® integrates solutions to provide remedial training to improve bad driving habits
- MVR background checks with a “continuous driver monitoring” option that offers near real-time alerts when employees receive violations

Sustainability

Reduce carbon emissions through telematics platforms

- Identify opportunities to reduce greenhouse gas emissions
- Receive data insights that can help guide fleet conversion to EV models
- Better manage EV and vehicles that become part of your fleet

Productivity

Boost dispatch and routing efforts with software solutions

- Plan and optimize last-mile delivery routes
- Manage dynamic dispatch in real-time (adding/deleting stops, rerouting)
- Produce detailed fleet management reports
- Optimize driver and asset tracking

Optimization

Lower CPM and net life cycle costs using telematics data

- Enhance vehicle maintenance and fuel management capabilities
- Lower CPM (cents per mile) operating costs
- Reduce/eliminate unexpected breakdowns that disrupt operations

Compliance

Meet FDA, DOT and FMCSA standards and regulations

- Ensure fleet meets FDA requirements for “cold chain custody” of perishable food and drug deliveries
- Automate ELD reporting and ensure drivers meet DOT/FMCSA requirements
- Maintain compliance for DVIR and IFTA reporting

Expandability

Add advanced, flexible technology to improve safety and performance

- Video telematics/dash cameras enhance risk management oversight
- Reduce vehicle insurance rates
- Reduce workers compensation insurance rates
