Guide-Rails Recognized in 2021 Gartner® Market Guide for Value Stream Delivery Platforms

Report reflects how, " Software engineering leaders should implement VSDPs to enhance developer experience and integrate security and compliance for rapid delivery of customer value*."**

SANTA CLARA, Nov. 30, 2021 / Guide-Rails (www.guide-rails.io) , the first platform built for the end-to-end software delivery lifecycle, today announced it has been recognized as a Representative Vendor in the 2021 Gartner Market Guide for Value Stream Delivery Platforms (VSDPs).* The Market Guide states that "By 2024, 60% of organizations will have switched from multiple point solutions to value stream delivery platforms to streamline application delivery, up from 20% in 2021."

"We believe this market guide provides an additional validation point to our vision of reinventing software development," said Eric Billingsley, CEO and co-founder of Guide-Rails. "With cyber threats and security breaches continuing to increase, raising the bar on software supply chain security is a must. The great thing is, we help firms accomplish this and achieve a faster time to market at the same time."

According to this Market Guide, "A unified platform provides end-to-end visibility and helps reduce cycle time by minimizing friction due to handoffs and improving consistency in workflows. This end-to-end view encourages systems thinking over local optimization and enables organizations to continuously improve through accelerated feedback loops."

By unifying the Guide-Rails platform capabilities with point solutions used today, the end-to-end process is streamlined and automated – meeting the needs of development, operations, security, and product owners. Instead of maintaining and building toolchains, platform teams can focus efforts on the people and the process.

About Guide-Rails

Guide-Rails is the first platform built to address the end-to-end software delivery lifecycle. It's not just CI/CD plus some additional tools, the platform integrates and orchestrates point solutions with the platform to enable modern development practices out-of-the-box. With a foundation built for security and transparency, compliance efforts are automated plus individuals across the organization have immediate access to the information they need.
