

Want your own
structured finance
tools exactly as you
envision them?

Pricing & Analytics Solutions for Structured Finance

You know what you want to do.

In a perfect world, your data tools don't keep you from doing it.

We have the experience and ability to help.

Thetica Systems began its unique problem-solving in 2008, building custom systems to assess portfolios in the depths of the financial crisis, and our products and platform have expanded continually ever since.

Our unique approach brings unique benefits

We design exactly what you want and integrate with your own scenario assumptions, no matter how complex.

We integrate essential data from more sources, including your internal sources, more flexibly than any other provider, and we can add on any needed data set.

Easy access through the web interface permits an unparalleled level of customization.

Our simple API is open to those who wish to automate calculation jobs themselves or we design to client specifications.

A single solution for all deal types that brings together your licensed data and users, integrates your specific logic, models, and reporting, and connects to your other systems and data

With Thetica Systems you can:

Gain ROI immediately, without waiting for external vendors or IT clearance

Automate integrated data for analysis and action in a fraction of the usual time

Streamline bidding and research processes

Eliminate manual work to pull in data and set up calculations

 *Get full value from your licensed data*

A single solution that fits the way you work:
integrated, customizable, and up and running fast.

Building on our powerful **infrastructure** building blocks and modules, we quickly deploy the platform and integrate your licensed market data.

Your tools and database are **ready to use** with out-of-the-box functionality.

We then customize **your ideal system**, including the database and analytics engine, and maintain and enhance it as needed.

You benefit from ongoing access to specialized knowledge, particularly for all aspects of **Intex data** and tools.

A complete platform, not just an app

Thetica Systems delivers the only customizable solution for multiple bond types within a single platform.

Our decades of experience as an [Intex partner](#) and data integrator for structured finance are the heart of what differentiates us. We combine that specialized knowledge with our proven, proprietary infrastructure components to deliver a custom platform in a fraction of the time. And we can do this with all data, whether licensed externally or generated internally.

You get a [truly individual system](#) tailored to price, analyze, and compare bonds in exactly the way you want.

Find out how you can benefit from the powerful simplicity of our unique approach.
