

EMERGING LEADERS PROGRAM

Do you have entry level or newer leaders that have amazing capacity for growth?

Did you know that as many as up to 60 percent of new managers under-perform or fail within their first two years?

With more millennials entering the management realms, it's critical to prepare them for not only day-to-day activities, but how to show up and be seen as effective future leaders in the organization. Velocity's Emerging Leaders program focuses on providing the best tools and frameworks **that deliver greater contributions to the organization, creating a clear path for professional growth.**

This program is structured around the 70/20/10 model. Velocity will help support you through strategic workshop facilitation with engaging facilitators, toolkits, frameworks, homework and group cohort coaching. The Cohort model helps to solidify what was learned in the workshops into day to day life. **In addition Velocity can leverage a group project to bring it all to life.**
