

mC-Print2™

Sleek, Compact, Connected

True to its motto—Always Leading, and Always Innovating—Star Micronics is proud to offer the mC-Print2™, a 2-inch retail point of sale (POS) printer, in its mCollection.

Star's mC-Print2 matches the sleek and modern design of tomorrow's retail environment, while providing the exceptional functionality you need today. This top loading, 2-inch, compact receipt printer features multiple communication interfaces in one model: traditional USB, Lightning USB (data and charge USB for iOS), MFi Bluetooth, WLAN, and Ethernet (Local, WebPRNT and CloudPRNT). It also includes hub functionality for communications with peripherals including cash drawers, scanners, customer displays, and scales. This flexibility makes it ideal for many applications, from legacy POS to the latest tablet and web-based solutions in grocery, pharmacy, salon, restaurant, and other retail and hospitality environments.

The mC-Print2 also includes SteadyLAN™ technology, which provides wired Ethernet service to an iPad connected to a networked printer via the Lightning cable (iOS10 or later required). SteadyLAN is available on the following model: mCP21LB.

Environmentally conscious, the mC-Print2 also supports your sustainability initiatives to reduce paper waste by producing quality receipts on thin paper and reducing the receipt top

margin to 2mm. In addition to saving money on consumables, the mC-Print2 also helps keep costs down with easy setup and installation.

When you incorporate the mC-Print with Star Micronics Cloud Services with digital receipts, cloud promotion print management, and device management, you will achieve the next generation of POS printing through a wealth of onboard marketing and receipt tools that meet the demands of today's—and tomorrow's—multichannel world.

Features:

- 2-Inch Thermal Printer
- Stylish and Compact Design
- Smart Receipt Issuing — *Print Flat Technology*
- Multiple Interfaces — *Traditional USB, Lightning USB, Bluetooth, WLAN, LAN (Local, Web, and Cloud)*
- Peripheral Device Connectivity — *Cash Drawer, Customer Display, 1D/2D Barcode Scanners, Scales*
- Wide Software Support — *Native OS, Web, and Cloud*
- SteadyLAN™ Technology — *Provides Wired Ethernet Service to iPad via Lightning Cable*
