Augmented Reality Made by Your Workers

No Experience Required!

simpleAR.io

ARcreate

ARcreate is an AR creation tool for business users and subject matter experts to create powerful custom AR applications simply while doing their job.

Your most knowledgeable experts, replicated.

So many times, critical parts of your business aren't documented, especially the most important tricks of the trade. Now your best experts can capture their knowledge and make it permanently available to novices and experts alike, in real-time 3D AR format - allowing rapid upskilling and removing major resource bottlenecks.

- A location-based 3D Augmented Reality creation and distribution software tool
- Intuitive user interface – minimal learning curve
- No engineering or AR experience required
- Create, test and publish in minutes, not hours or days
- Create instructional and training content while performing the task on the job
- Integrates with new & existing audio, video, graphics and text
- Supports native device speech-to-text translation
- Uses AI to translate text-to-speech, for guided instructional narration
- Manage your users via cloud-based identity management
- Supports iOS & Android AR enabled devices
- IMRSA (International Mixed Reality Standards Association) Compliant

IMRSA COMPLIANT
